

Table 2

Based on the firewall	Service	Source	Destination	Priority	Guaranteed rate (KBps)	Limited rate (KBps)
Yes	Application-based service → p2p	Any	Any	7	0	10
No (Prioritise small packets)	-	-	-	0	60	200

The rules mentioned in Table 1 will set protocols with their priority over other protocols, for guaranteed speed.

- The rules given in Table 2 will manage the upload speed for the protocols on *eth0*.
- After adding all the rules, click on *Save changes*.
- With these steps, you have set the priorities of the protocols and applications. One last thing to be done here is to set the upload and download rates of the server. To do this, click *Interface rates* under *Traffic Shaping*.
- Click *Action*. Change the upload and download speed of the server, supplied by your service provider. Click *Change* and then *Save changes*.

Setting up Users and Computers

Setting up of groups and users can be done as follows.

Group set-up: For this, follow the steps shown below.

- Click *Users and Computers* under the *Office* section.
- Click *Manage*. Select groups from the LDAP tree. Click on the plus sign to add groups.

Users' set-up: To set up users for the domain system and captive portal, follow the steps shown below.

- Click *Users and Computers* under the *Office* section.
- Click *Manage*. Here you will see the LDAP tree. Select *Users* and click on the plus sign.

With all the information entered and passed, users can log in to the system through the captive portal.
