Here's a Bluetooth-enabled keyboard to switch between paired devices

Logitech has introduced an innovative Bluetooth keyboard, the K480, which is compatible with multiple devices. It's a wireless gadget that works with Mac, Windows and Android devices. The selection dial, located above the Escape key, allows switching between paired devices.

The key features of the K480 are that it supports up to three different Bluetooth devices, enables easy switching between multiple device profiles and also saves battery life. It is cross-platform and there is no need for a dongle, as long as the target device is Bluetooth-enabled. The function keys have some multimedia or mobile-specific buttons and for Android devices, an extra app can be installed to provide additional keyboard layouts. The keyboard has two pre-installed AAA batteries. The best feature of the keyboard is definitely its key layout, which is quite spacious and offers a quick set-up process at a modest price, for almost all major operating systems.

The Oppo R5 could be the world's slimmest smartphone

Oppo Electronics, the Chinese firm, has launched the Oppo R5 handset, which is touted to be the world's slimmest smartphone. The Oppo R5 smartphone is just 0.48 cm thick and has surpassed the Gionee Elife S5.1 handset, which is 0.5 cm thick. It was even recognised by the Guinness Book of World Records as the slimmest smartphone when it was launched. It has got both metallic and ceramic finishes at the corners, and supports a 13.21-cm full HD AMOLED display with a 1080 x 1920 pixel resolution and 423 ppi pixel density. It is powered by a 64-bit octa-core Qualcomm Snapdragon 615 (MSM8939) SoC clocked at quad 2.1GHz and quad 1.5GHz. It has 2GB RAM, Adreno 405 and 16GB internal storage memory, which are not further expandable. The device runs on the company's proprietary ColorOS 2.0.1 (based on Android 4.4 KitKat) and supports a single micro-SIM. The Oppo R5 smartphone sports a 13MP rear camera and a 5MP front-facing shooter. The primary camera features a Sony IMX214 sensor, an f/2.0 aperture and an LED flash. It has a 2000mAh battery with VOOC technology, which can charge the device from 0 per cent to 75 per cent in just 30 minutes.
