

Dell launches two Android tablets in India

Dell has introduced the refreshed versions of its Venue 7 and Venue 8 Android tablets in India. Both run the Android 4.4 KitKat OS and are available with 16GB internal storage space, which can further be expanded up to 64GB via microSD card. Also, both the devices are backed by a 4550mAh battery. The Venue 7 tablet sports a 17.78-cm IPS display WXGA with a 1280 x 800 pixel resolution, and is powered by the 1.6GHz dual-core Intel Atom Z3460 'Merrifield' processor along with 1GB RAM. The device has a 5MP rear camera and a 1MP front-facing camera. The Venue 8 tablet has a 20.32-cm (8-inch) full-HD IPS display with a 1920 x 1200 pixel resolution. It is powered by a 2.1GHz dual-core Intel Atom Z3480 'Merrifield' processor coupled with 1GB RAM. It comes with a 5MP rear camera and a 2MP front-facing camera.

Price of the Venue 7 : ₹ 11,999

Price of the Venue 8 : ₹ 14,999

Raspberry Pi Foundation launches cheapest ever miniature computer—the Model A+

A new and smaller version of Raspberry Pi Model A has just been unveiled by the Raspberry Pi Foundation, and it has been named Model A+. Its basic configuration is similar to the original Model A. Some features have been adopted from the recently launched Model B+. Model A+ is packed with a Broadcom BCM2835 SoC and 256MB RAM, just like its predecessor, but the SD card slot has been switched to a microSD slot. There are 14 new general-purpose input-output (GPIO) pins too, which can be used for building connections between additional sensors. The audio circuit has also been improved, which ensures a low-noise power supply. The board also consumes less power, and its width has been reduced to 65 mm from 86 mm.

The features of the Broadcom BCM2835 SoC are its 700MHz ARM11 CPU core and Videcore IV GPU. Its video output is supported by HDMI. This is the cheapest ever miniature computer from the Raspberry Pi Foundation, making it more affordable for students and budding entrepreneurs to build exciting devices. It was first introduced along with Model B+. The Raspberry Pi Model A+ boards are getting manufactured at a Sony-owned factory in the UK.

Price: ₹ 1,230

Zebronics introduces two new external power banks

Zebronics, has introduced external power banks in two capacities to keep smartphones and tablets running all the time. The Zeb-PG4400, with a capacity of 4400mAh, and the Zeb-PG2200, with a capacity of 2200mAh, are ideal for today's generation of 'connected' mobile enthusiasts, whether they are working, talking, surfing or sharing content on social media.

Available in two elegant colours, smoked grey and lively orange, the device has a soft-touch, scratch-resistant rubber finish and is ultra-light —weighing just 120 grams. In use, it provides a standard USB port for charging most compatible smartphones and tablets via the included matching micro-USB cable, for uninterrupted mobility. Its in-built LED torch can be handy in an emergency. An LED indicator on the Zeb-PG4400 external power bank shows the device's readiness to charge or the amount of charge left in the charger. Safety features include input and output short protection, over-charging and over-discharging protection and an auto-recovery feature after short protection.

Price of the Zeb-PG4400: ₹ 900

Price of the Zeb-PG2200: ₹ 400
