

queues were witnessed at the HP Helion and Microsoft booths in between the sessions. There were many intriguing activities conducted at these two booths, with a lot of goodies being given away to the participants. Speaking about this, Rajiv Pandey, distinguished technologist, HP Cloud, said, "I think the event is great and it is amazing to see what's going on with open source here in India. I loved the energy and excitement here; it's really nice. While talking to people coming to the HP booth, I realised that they know so much about the new technologies and that they are very up-to-date, which was very gratifying. It's been a great event. It's already been 11 years of OSI and there clearly has been good work put into it. I would love to be a part of it in the years to come."

Wipro Talent Hunt: IT giant, Wipro Technologies, had tied up with Open Source India 2014 to recruit candidates for diverse profiles and a few applicants were shortlisted too.

Day 1

The first day of the convention began with the welcome speech by Rahul Chopra, managing director, EY Group. He spoke about Open Source India's 11-year journey and thanked everyone for the love they have shown for this event.

The sessions started with a keynote by Rajeev Pandey, distinguished technologist, HP Cloud, who spoke about 'Deployment architecture for OpenStack in the enterprise', which set the ball rolling for an eventful day for the IT professionals. He kept the audience enthralled with his vast knowledge and brilliant presentation skills.

The crowd then dispersed into the various halls and workshop rooms where different sessions were being conducted. The first half of Day 1 had 'FOSS for everyone', 'Cloud and Mobile App Development' tracks, and the speakers included Anthony Rees (HP Cloud), Jose Miguel Parrella (CTO, M&O, Microsoft Corp) and Michael Meskes (CEO, Creditiv International GmbH), amongst others. Apart from these sessions, there were hands-on workshops going on simultaneously on topics like 'MySQL performance tuning', 'Drupal' and 'Architecting and building solutions using MongoDB'.

The second half of Day 1 also started with a keynote, this time by Ramesh Srinivasan, senior director, Linux and virtualisation, Oracle and Sanjay Manwani, director, MySQL, Oracle India. They enlightened the audience on how far open

source has travelled, discussing the state of the Penguin, and the Dolphin. Other post-lunch tracks included a mini conference on 'OpenStack and the kernel' as well as a workshop on 'Big Data'.

Everyone, including the exhibitors, speakers as well as the attendees, seemed satisfied with the efforts put in by the OSI content team and expectations grew for the second day.

Day 2

With Day 1 being a great success, the second day was filled with open source enthusiasts eager to acquire more knowledge about the latest trends and technologies. Day 2 commenced with a keynote session by Jose Miguel Parrella, CTO, M&O, Microsoft Corp, who spoke about 'Innovations in the open source world', which was then followed by various tracks. Sessions on Day 2 included 'Success stories', 'Databases', 'Web app development' and 'IT infrastructure management' as well as workshops on 'Cross-platform mobile app development', 'Programming OpenStack', 'Software architecture in 90 minutes' and 'HP Helion OpenStack'.

The post-lunch keynote by Kamal Brar, VP, Asia-Pacific, MongoDB, was another hit and was dedicated to the innovations in the FOSS world. The OSI team went around getting as much feedback as possible, and was pleased to find out that everyone was satisfied with the show. Vikram Bhatia, director and technical evangelist, HP Cloud; Ryusuke Kajiyama, MySQL sales consulting manager, APAC; and Jose Miguel Parrella, Microsoft Corp, were interviewed by the OSI team on the second day and they spoke about their careers, their visit to OSI, their ventures and much more. Day 2 as well as the 11th edition of Open Source India ended well, with the hope of taking this event to an even higher level. All the speakers, exhibitors, attendees and the sponsors have extended their support for the 12th edition of OSI.

The NIMHANS Convention Center is huge, and to fill it up with the right people is a challenge in itself. The stalls of the partners, which included HP Helion, Microsoft, MongoDB, Oracle, Zimbra, Wipro and Unotech, were beautifully set up. The speakers were very enthusiastic about sharing their feedback with us. Rajesh Sola (from C-DAC's advanced computing training school, Pune), who spoke on 'Android Open Accessory Protocol-Turn your Linux Machine into an Android Development Kit (ADK), said, "I have enjoyed the event thoroughly, and I just love the idea of enterprises connecting with technology. I look forward to next year."
