**Mayur Nandurkar:** Hi, I have installed Ubuntu 13.10 along with Windows 7. But now I want to uninstall Ubuntu 13.10. Can you provide me the solution for this?

Like · comment

**Anand Kethavarapu:** Remove the Ubuntu partition from Disk Management under Computer Management and issue command `fdisk/mbr` at command prompt. I am sure this will help you sort out your problem.

**Yogesh Jadhav:** Find "Wubi" in add/remove program and then uninstall it. Please feel free to get back if you face any other problem.

**Charul Agrawal:** Hi, I want to build an application using Knockout.js as front end and Ruby-on-Rails as backend. Can you suggest me some resources on how to integrate both? Thanks in advance.

**Yogesh Jadhav:** You can visit the website and clone the sample git rep that is uploaded there:- <https://github.com/jacobat/Knockout-On-Rails>. Hope this will help.

**William Biggs:** Does anyone know of a good WYSIWYG editor for HTML?

Like · comment

**Philippe Masson:** TinyMCE is a platform independent, web based Javascript HTML WYSIWYG editor control released as Open Source under LGPL. It is included in many open source projects as XOOPS CMS. Please let me know if I have been able to answer your query.

**Gustav Fridell:** Any suggestions on some good ways to learn about network and security?

Like · comment

**Anand Kethavarapu:** Fridell, RHEL Security and Network Administration covers the entire program. RH254 training program covers what you are looking for. More details can be found at <http://in.redhat.com/training/courses/rh254/>

**Gustav Fridell:** Thank you Anand Kethavarapu.

**Boris Wolfsohl:** Hey guys! I can't connect my bluetooth headphones with my Computer with Ubuntu. I am using a USB dongle bluetooth. I was trying everything, but it is simply not working. Could give me a advice?

**Max Sapain:** Try ou this link: <http://linuxowns.wordpress.com/.../how-i-got-my-usb-.../>

**Boris Wolfsohl:** Sorry but that solution is for Windows. I'm working with Ubuntu. Can you give a suggestion?

**Pankaj Tiwar:** An unhandled exception occurred during the Fedora 17 installation. How to solve it? Can you help me geeks?

Like · comment

**Yogesh Jadhav:** Change the installation media.

**Shubham Attri:** Why did this bug arrive?

**Yogesh Jadhav:** According to me, pygui\* package is not copying properly.

**Laksh Singla:** Can somebody tell me any alternative on how to compile and install a software from .tar or .tar.gz file. The commands `'./configure'`, `'make'` and `'make install'` show error (in most of the linux distros). Please enumerate the possible errors.

**Rahul Ghose:** There's a cool tool called "kompile".

**Laksh Singla:** Can you tell where to download it and how to install it?

**Rahul Ghose:** Depends on your OS. What is it?

**Laksh Singla:** Red hat enterprise linux, Ubuntu and Fedora (Dual boot between RHEL and Ubuntu, Fedora in another laptop)

**Rahul Ghose:** In Ubuntu, you can install via apt-get install kompile. In Fedora use yum install.
