

WordPress

WordPress is a free and open source blogging product based on PHP and MySQL, and a CMS that runs on a Web hosting service. WordPress is one of the most popular blogging systems due to its rich feature set and enhancements. It comes in two flavours: WordPress.org is an open source CMS that has been created, supported, managed and maintained by a community of passionate developers. WordPress.com is a shared hosting platform that uses WordPress and manages security, updates and backups for its users. As a user, you need not worry about installation with WordPress.com.

OpenKM

OpenKM is available in two different variations—OpenKM community edition under the GNU GPL v2, while OpenKM Cloud helps organisations share and manage information better, yet without investing heavily. It is available across all platforms such as MacOS X, Windows and Linux.

Users can access the OpenKM application through a variety of browsers such as Internet Explorer, Google Chrome, Opera, Firefox and Safari, because it implements a Web 2.0 user interface framework based on Google Web Toolkit. Mobile UIs are also supported. Content Management Interoperability Services protocol, an OASIS open standard, allows integration with a variety of document management systems and repositories. OpenKM uses the Spring Framework and, hence, Spring Security centralises access management based on credentials. In addition to this, it can be easily integrated with most anti-virus products. The OpenKM Core centralises the management and processing logic for documents, folders, emails and records, and a combination of metadata structures. It also uses the JBPM workflow engine for workflow

Table 2: WordPress.org vs WordPress.com

	WordPress.org	WordPress.com														
Cost	Download and usage is free; domain and hosting charges apply	Up to 3 GB usage is free. Memberships are available														
Themes	2,178 themes are available at http://wordpress.org/themes	Only limited themes are available. Premium themes can be purchased from the store. Unlimited premium themes at \$120 per year.														
Plug-ins	28,521 plug-ins are available as of now at http://wordpress.org/plugins/	Limited plug-ins access to premium members														
Storage	Unlimited (chargeable by hosting provider)	<table><tr><td>Free</td><td>up to 3 GB</td></tr><tr><td>10 GB</td><td>\$20.00</td></tr><tr><td>25 GB</td><td>\$50.00</td></tr><tr><td>50 GB</td><td>\$90.00</td></tr><tr><td>100 GB</td><td>\$160.00</td></tr><tr><td>200 GB</td><td>\$290.00</td></tr><tr><td colspan="2">USD per year</td></tr></table>	Free	up to 3 GB	10 GB	\$20.00	25 GB	\$50.00	50 GB	\$90.00	100 GB	\$160.00	200 GB	\$290.00	USD per year	
Free	up to 3 GB															
10 GB	\$20.00															
25 GB	\$50.00															
50 GB	\$90.00															
100 GB	\$160.00															
200 GB	\$290.00															
USD per year																
Ads	Easy to add advertisements	Word ads are available if your site has 25,000+ views in a month														
Maintenance	Responsibility of owner	Owner needs to worry about the content. WordPress.com will manage all other updates, backup and installation related tasks														
FTP access	Yes	No

OpenCms

OpenCms is an open source CMS written in Java and distributed by Alkacon under the LGPL. To deploy OpenCms, a JSP servlet container such as Apache Tomcat or JBoss is needed. UNICEF Netherlands, LGT Bank of Lichtenstein, and BP South Africa are some of the major adopters of OpenCms. Its main features include internationalisation support, content versioning, asset management, workflow management, user management, an inline editor, a form-based content editor generated from an XML schema, a WYSIWYG editor, an easy and intuitive page editor, a sitemap editor, SEO, gallery organisation with the intuitive content gallery interface, Solr Integration for noSQL-like queries, CMIS integration for accessing the content repository of OpenCms in a standardised way, shared folders, a content subscription engine, and an advanced HTML5-based upload dialog box for multi-file uploading. Other features include
