

Are You In Suspense?

Are you wondering what happened to your order or payment, even after a fortnight? But did you mention your name and address clearly while sending payment, and what the payment was for?

We get several payments every month without adequate instructions or even identity of the person sending the payment. As a result we are unable to take appropriate action on these, till we get a complaint - if at all.

At EFY, we want you to be our satisfied customer. So please do let us know in case your payment or instructions are not even acknowledged within a fortnight. We are not that lazy!

Jono has been an iconic figure while building up the Ubuntu community that we know today. However, he leaves Canonical at a time when the company is reeling under a string of controversies, one of which involves Jono himself. He had called Richard M Stallman's stand on Ubuntu's privacy as childish, a statement he later apologised for. Jono however insists he is not leaving Canonical due to any controversy but has simply gone ahead and grabbed an excellent opportunity that came his way. "I am not leaving Canonical due to problems; I am moving on to a new opportunity at XPRIZE. I actually wasn't looking for a move; I was quite content in my role at Canonical, but XPRIZE came out of nowhere, and it felt like a good next step to move forward to," Jono was quoted as saying.

Google's Apps Mobile Management for Android gets a major overhaul

As 'bring your own device' (BYOD) becomes a major part of how businesses operate today, global search engine giant Google has brought about a major overhaul in the Android management features. The overhaul is expected to help IT admins control access to the suite from their Android-powered devices.

As part of the overhaul, IT departments can trigger an account wipe in case a device hasn't been synced with the server for a pre-determined period of time, courtesy Google Apps Mobile Management for Android. "So a lost device that wasn't reported or the old device left in a drawer does not cause a security risk," Clayton Jones, a product manager in Google's enterprise unit, was quoted in a blog post.

Google Apps Mobile Management is available for the Business, Education and Government editions of the suite. In addition, it can manage devices running iOS and Windows Phone, as well as smartphones/tablets using Microsoft Exchange ActiveSync, like the BlackBerry 10.

**Looking to get started with OpenStack?
Try Canonical's new cloud-in-a-box**

If you're looking for a quick, easy way to get started with the intricacies of the OpenStack cloud infrastructure, Canonical is around to help! After generating rave reviews at the recent OpenStack Summit in Atlanta, Canonical's cloud-in-a-box, a.k.a. the Orange Box, is now up for grabs.

Encased within a rugged black flight-case frame with built-in handles, the Orange Box is meant to provide useful instructions on OpenStack and other technologies via the Ubuntu Jumpstart training program. It will come loaded with Ubuntu 14.04 LTS, Metal-as-a-Service (MaaS) and Juju. “We are delighted to introduce a new delivery mechanism for Jumpstarts, leveraging the innovative Orange Box,” sources in the company were quoted in a statement. The statement said, “We’ll deliver an Orange Box to your office, and work with you

for two days, learning the ins and outs of Ubuntu, MAAS, Juju, Landscape, and OpenStack, safely within the confines of an Orange Box and without
