

Install the image created by *appliance-creator* using *virt-manager*. You will probably need 3 GB of memory to successfully install OpenStack.

Now you are ready to follow the RDO 'quick start' instructions (<http://openstack.redhat.com/Quickstart>).

The following commands are fairly quick:

```
# yum install -y http://rdo.fedorapeople.org/rdo-release.rpm
# yum install -y openstack-packstack
```

The *packstack* command makes it simple to install OpenStack and the dependencies. It uses Puppet. However, the *packstack* command may take a long time, depending on the network and download speeds (I usually find it better to add '*&country=us,ca*' to Fedora and update repositories for the Indian environment).

```
# packstack --allnone
```

You may find that the above command fails to run the remote script after setting up the *ssh* keys. If so, you need to set up authorised keys.

```
# cat /root/.ssh/id_rsa.pub >> /root/.ssh/authorized_keys
```

The first time Packstack is run, it creates an answer file with a name like *packstack-answers-X-Y.txt*. You will need to reuse the same answers in case you have to rerun Packstack.

```
# packstack -answer-file packstack-answers-X-Y.txt
```

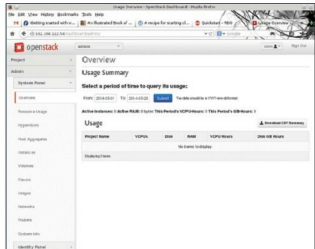

Figure 1: OpenStack

After Packstack completes successfully, the local cloud is ready. You can browse the site <http://SVM-IP-ADDRESS/dashboard>.

Some things to think about

What do you do with the local cloud you have set up? How do you create and manage the virtual machines that you need?

OSFY Magazine Attractions During 2014-15

MONTH	THEME	FEATURED LIST	BUYERS GUIDE
March 2014	Network monitoring	Security	-----
April 2014	Android Special	Anti Virus	Wifi Hotspot devices
May 2014	Backup and Data Storage	Certification	External Storage
June 2014	Open Source on Windows	Mobile Apps	UTMs to SME
July 2014	Firewall and Network security	Web hosting Solutions Providers	MFD Printers for SMEs
August 2014	Kernel Development	Big Data Solution Providers	SSD for servers
September 2014	Open Source for Start-ups	Cloud	Android devices
October 2014	Mobile App Development	Training on Programming Languages	Projectors
November 2014	Cloud special	Virtualisation Solutions Provider	Network Switches and Routers
December 2014	Web Development	A list of leading Ecommerce sites	AV Conferencing
January 2015	Programming Languages	IT Consultancy	Laser Printers for SMEs
February 2015	Top 10 of Everything on Open Source	Storage Solution Providers	Wireless routers
