```

Figure 6: Enable IP forwarding

```
sudo iptables -A FORWARD -i eth0 -o eth1 -j ACCEPT
```

Do not forget to save these iptables rules, or they will be lost after the next system reboot as they are stored in volatile memory.

```
# iptables-save > /etc/iptables.rules
```

The above command will activate previously saved

```

mandar@mandar:~$ ifconfig | grep inet
