

```
tcpdump -nn -r capture.pcap 'tcp or udp' | cut -f 5 -d " " |
cut -f 1-4 -d "." | sort | uniq | head
```

```
tcpdump -nn -r capture.pcap 'tcp or udp' | cut -f 5 -d " " |
cut -f 1-4 -d "." | sort -c | uniq -nr | head
```

Web tools

If you have a PCAP file you want to analyse but don't have the tools or the *sudo* password to do so, try online tools such as Wireshark. I am using the small example file which was used for the challenge in *picoCTF*, where we need to find the destination of the ship from the conversation between the robot and the spaceship. This

The alternatives for the cloud shark are given in the following urls.

<http://www.wireshark.org/>
<http://canyouseeme.org/>
<http://www.lovelymytool.com/>
<http://www.yougetsignal.com/>
<http://sectools.org/>

You can try any of the tools from the above links. Some of them provide tools from the browser itself. **END**
