

books or financial reports from their mobile devices.

- It has advanced reporting and analytics including expense management and BI-like reporting features.
- You can control which mobile devices access email, prevent data loss, encrypt sensitive data, enforce advanced compliance policies and allow users to easily sync email through the self-service portal.
- It supports native email clients, enterprise services, cloud-based clients, as well as its own clients.
- AirWatch Browser allows administrators to define and enforce secure browsing policies from the admin console.
- It provides support for laptop management and multi-user management.

Features of SOTI

- It supports remote diagnostics and troubleshooting issues anytime, anywhere with the help of BlitFire 10X technology.
- It establishes a virtual fence to keep devices in a specific area, or to trigger a warning or action if they enter or exit the fence.
- It provides advanced Web-filtering technology that allows companies to enforce the responsible use of mobile devices.
- It provides desktop grade anti-virus and malware protection to managed devices.
- Its secure content library integrates seamlessly with existing content management infrastructure to provide secure access to content.
- It supports the setting of thresholds, the management of wireless expenses, and prevents nasty surprises related to overshooting roaming budgets by sending timely alerts.

- It gains extensive control over hardware and software features across managed devices. MobiControl provides security and protection of enterprise valuable data.
- It helps apply enterprise-wide policies or to tailor policies for specific organisational needs.
- It helps ensure no device is left behind by alerting and taking action on out of contact devices.
- It helps ensure responsible use of corporate voice minutes by whitelisting or blacklisting specific phone numbers for individual users or groups.
- MobiControl's rich reporting capabilities allow companies to report on a wealth of live device data and generate meaningful insights.

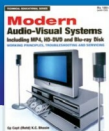

The idea of a post-PC world is quickly becoming a reality. EMM is becoming necessary for any organisation that manages more than a handful of mobile devices. Assessing your company's needs and accordingly choosing the right EMM solution is the key to achieving the expected return on investment (ROI) for an enterprise mobility solution. **END**
