

Figure 8: Copying installation files

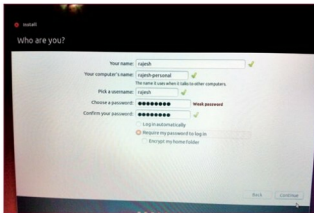

Figure 9: Creating a user

shown in Figure 11 when you log in.

You can install any software from the Ubuntu Software Centre and it will be available in your USB PC, no matter where you run it.

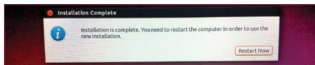

Figure 10: The installation is complete!

Figure 11: The first screen

One important point to note is that you should choose 32-bit Ubuntu (as mentioned in pre-requisite number 3) if you intend to use your USB PC on any hardware. The 64-bit version will work only when you run it on 64-bit hardware (laptops or PCs). And if you decide to choose the 64-bit option, then during embedding (Step 2), you should use a 64-bit laptop or PC. **END**
