Access the Internet any time with D-Link's mobile router

If you are looking to access high speed Internet while you are on the move, D-Link's 3G enabled mobile router, the DWR-730, can be a good option. D-Link DWM-730 is a business card sized, portable HSPA+ 21.6 MBps router that allows users to connect notebooks, tablets and smartphones to the Internet anytime via a 3G connection. Users can also share this connection with up to eight users wirelessly.

The D-Link DWR-730 router is unlocked and is compatible with both Linux and Windows and a wide range of mobile service networks. D-Link DWR-730 is currently available all across India, and is being retailed through D-Link's wide network of business distributors, channel partners and large format retail stores.

Anoop Jarial, VP, Product Marketing, D-Link (India) Limited, said, "There is a constant demand for Internet devices offering high-speed connectivity. D-Link has always been in the forefront offering the latest and the best of networking technology. This new 3G-enabled device from D-Link is designed to address the needs of frequent travellers, home users and people seeking wire-free connectivity."
