

Portronics launches Bluetooth headset called Ecollar

Portronics has come up with a stylish Bluetooth headset, which acts as a controller to your smartphones and tablets. This handsfree mobile companion allows you near perfect control of your smartphone and tablet, enabling you to safely use your phones' functionality while driving. The Ecollar is available in black with a very sleek design.

The Ecollar comes in a very compact and stylish crystal packing, bundled with a set of in-ear headphones with rubber tips that give you a good fit, and a micro USB charging cable. The ear phones are designed to be worn around your neck. The face of the device supports the buttons for volume and track control, and a call button for receiving calls. The device alerts you when a call comes in, which can be received with the tap of one button on the device.

The coolest feature of the Ecollar is that you can connect it to any set of speakers, provided they use a 3.5 mm jack, to make them Bluetooth compatible. Shared Jasmeet Singh, director, Portronics, "We have always tried to come out with unique products for consumers at all levels. We hope to continue coming up with innovative products in the future too, and expand our portfolio."

Price: ₹ 2,200

Xolo expands its Q series with Q1100

Xolo has been on a launching spree! After coming out with a series of smartphones, the company has launched the Q1100, which has a 12.7 cm (5 inch) HD display and runs Android 4.3. Priced at Rs 14,999, it is armed with a quad-core Qualcomm Snapdragon 400 (MSM 8228) processor, clocked at 1.4 GHz. Powered with a 2000 mAh battery, the smartphone comes fitted with an 8 MP rear and 2 MP front camera. The Xolo Q1100 handset comes with 8 GB of in-built storage, which can be expanded up to 32 GB via a microSD card. At the launch, Sunil Raina, business head at Xolo, said, "The Xolo Q1100 is amazing not only in terms of the smartphone experience, but also in terms of its value proposition. The increasing consumer base for a large-screen device has prompted us to once again bring out such a device into the market."
