E-Vision's biometric fingerprint reader for SMBs

Small and medium enterprises can now easily track the log in and log out time of their employees. E-Vision, a leading provider of advanced surveillance products, has come out with the EV BM AC P Biometric Fingerprint Reader that will help SMBs track their employees' working hours. The EV BM AC P Biometric Fingerprint Reader is equipped with a 7.11 cm (2.8-inch) TFT colour LCD screen and 360 degree contrast angle. The fingerprint reader supports fingerprint, password card and radio-frequency identification cards.

Vijay Shandilya, CEO at E-Vision, said, "The use of biometric fingerprint readers has become mandatory for SMBs. Our product caters to this requirement. We at E-Vision believe in developing and adopting new technology to serve our consumers."

An innovative switch from Edimax that aims to make your home 'vibrant'

Imagine living in a home where virtually every device can be controlled remotely, at one go. Edimax Technology has made this possible for you. The company has come out with the SP-1101W switch that plugs into any wall socket and gives users the control to switch on/off or schedule a connected electronic device using a smartphone app. The free Edimax Smart Plug home management app can monitor, control and schedule all the electronic devices connected to Smart Plug switches. The smartphone app works on the Android platform too.

Sanjay Joshi, head, Technical & Projects (India) at Edimax Technology Co Ltd, Taiwan, said, "This is a very innovative product from Edimax. So, if you wish to give your lifestyle a boost and efficiently manage your home, this device is for you."
