

Goodbye XP: New Ubuntu theme takes you to familiar territory

Windows XP users are finally beginning to accept the fact that the XP era is now finally over and it's time to move on! Updating to a more modern and secure OS is not an option—it's mandatory. A new survey conducted by Tech Pro Research had earlier revealed that almost 11 per cent of organisations that lived and breathed XP will eventually switch to Linux. While XP users could have a viable alternative in Linux Mint, another Linux OS, Ubuntu, is not very far behind.

Ubuntu is light enough to run seamlessly on the kind of hardware you'll normally associate with XP, and the fact that it has a very familiar desktop layout means the switch from XP will be even easier. A new Ubuntu theme will now make XP users feel at home. While it's not a 100 per cent equivalent to what XP came with originally, yet the Ubuntu theme is as close as it gets for XP users. It comes with all three of the standard XP colour themes – blue, silver and olive – as also the well-known Windows XP background and a tux-themed XP style start button.
