

Figure 3: Password Gorilla

- **Data import:** Login data can be imported from different supported password managers.
- **Security:** The database is encrypted using JavaScript code on the browser and then sent to the website. It requires a passphrase to decrypt the database without which data cannot be accessed.
- **Support:** Works on any operating system with a major browser that has JavaScript enabled.

Password Gorilla

Password Gorilla is an open source, cross-platform, simple password manager and personal vault that can store login information and notes. Password Gorilla is a Tcl/Tk application that runs on Linux, Windows and Mac OS X. Login information is stored in the database, which can be accessed only using a master password. The passwords are SHA256 protected and the database is encrypted using the Twofish algorithm. The *key stretching* feature makes it difficult for brute force attacks.

Features

- **Portable:** Designed to run on a compatible computer without being installed.
- **Import of database:** Can import the password database saved in the CSV format.
- **Locks the database when idle:** It automatically locks the database when the computer is idle for a specific period of time.

Figure 4: Gpassword Manager

- **Security:** It uses the Twofish algorithm to encrypt the database.
- **Can copy credentials:** Keyboard shortcuts can be used to copy login credentials to the clipboard.
- **Auto clear:** This feature clears the clipboard after a specified time.
- **Organises groups:** Groups and sub-groups can be created to organise passwords for different websites.

Gpassword Manager

Gpassword Manager is a simple, lightweight and cross-platform utility for managing and accessing passwords. It is published under the terms of the Apache License. It allows users to securely store passwords/URLs in the database. The added entries can be marked as favourites, which then can be accessed by right-clicking the system tray icon. The passwords and other login information shown in the screen can be kept hidden based on user preferences.

Features

- **Access to favourite sites:** A list of favourite Web pages can be accessed quickly from the convenient 'tray' icon.
- **Quick fill:** Passwords and other information can be clicked and dragged onto forms for quick filling out.
- **Search bar:** The quick search bar allows users to search

Table 1: Top five password managers—a comparison

	Portable	Search function	Direct login	Password generator	Import/Export	Lock when idle	Favorite Bookmark	Operating system
KeePassX	Yes	Yes	Yes	Yes	Yes	No	No	Cross-platform
Password Gorilla	Yes	Yes	Copies credentials	Yes	Import from CSV format	Yes	No	Cross-platform
Clipperz	Web based	No	Auto fill	Yes	Yes	Only lock button	No	Any OS with Java enabled browser
Gpassword Manager	No	Yes	Credentials are dragged onto forms	Yes	No	No	Yes	Cross-platform
Password Safe	No	Yes	Auto copy	Yes	Yes	No	No	Windows, Linux beta
