

NEW PRODUCTS

Android-based connected car stereo now available in India

Clarion, a Japanese manufacturer of car audio, navigation and communication systems, via its Asian arm Clarion Malaysia, has launched the Clarion AX1—an Android-based connected car stereo. The first-of-its-kind car stereo available in India, Clarion AX1 is a complete infotainment device, and promises a new and exciting experience for all gadget and technology enthusiasts. Clarion has introduced this Internet-ready device with the Android operating system and it is compatible with all smartphones. The device allows you to browse the Internet and also allows Wi-Fi connectivity. To up the entertainment quotient further, Clarion has tied up with T-series, which will give users unlimited access to a wide range of music albums and songs. Clarion's technology partner, Infogo, operates an online music store that offers a catalogue of more than 25 million fully licensed, DRM-free songs to choose from the world's biggest music labels. It has a 16.51 cm (6.5 inch) WVGA TFT LCD display with built-in navigation voice guidance.

Bose launches two great audio products

Bluetooth speakers: The SoundLink Color Bluetooth speaker has a completely new design but is still every inch a SoundLink. It weighs just 0.5 kg, and is 12.7 cm wide, 5.3 cm deep and 13.4 cm high to fit easily into a handbag, knapsack or the palm of your hand. Bose has combined exclusive dual-opposing passive radiators with two high-efficiency transducers for full-range sound, including deep, low-note performance. It connects wirelessly to a smartphone, tablet or any other Bluetooth-enabled device, and uses voice prompts available in several languages to simplify the set-up process, and identify which source is connected. Turn it off, and it remembers the last eight devices it was paired with, when powered back on. It then automatically connects to the two most recently used—your iPhone, iPad, Android phone or other Bluetooth-enabled device. A 3.5 mm stereo auxiliary input is integrated on the back of the enclosure. The lithium-ion battery lasts up to eight hours of unplugged play time, and fully recharges with most USB power sources in as little as three hours. It comes in black, white, blue, red and mint.

Price: ₹ 11,138

Bluetooth headphones: The new SoundLink on-ear Bluetooth headphones deliver a new level of performance for this category. They offer crisp, powerful sound, new features and a design that's lighter and more comfortable than conventional Bluetooth headphones. Bose Active Equalisation and TriPort technology combine for smoother, more balanced sound. Mid-high frequencies are natural, and low-frequencies are detailed and full. Yet, there are no cords or cables, so you can take calls, or enjoy a video, movie or music, freely. These headphones debut new functionality and are so intuitive, anyone can use them. They connect up to two devices at a time and let you switch between each; so you can watch a video from your tablet while staying connected to your smartphone. Simple voice prompts identify who is calling, battery status and source connection. With commands on the ear-cup, users are in control: turn it on and off, answer and end a call, adjust volume, play/pause, or control tracks, without using your phone.

They feature soft ear cushions and a headband pad made of a fabric used in high-end automotive applications. They fold smoothly for compact storage in a matching case. The SoundLink Bluetooth headphones come in black or white, and charge easily with an included USB cable for up to 15 hours of listening.
