

The smart LG G3 Stylus finally debuts in India

LG has launched the much-awaited LG G3 Stylus smartphone in India. The Stylus version of the G3 is a pen-enabled smartphone that inherits the core DNA of the acclaimed LG G3. The LG G3 Stylus, with its large display, stylus pen and LG's proprietary camera UX features, has a smartly-priced package to go with it. The proprietary Rubberdium stylus pen that slides inside the G3 Stylus feels comfortable in any hand and complements the phone's 13.97 cm large IPS display. Jotting and sketching are easier and more precise when paired with LG's QuickMemo+ which lets users take notes or draw directly on images or maps. The stylus is compatible with a number of third-party handwriting and drawing apps. Optimised for various 3G markets' wireless networks, the G3 Stylus will be offered with dual SIM devices with NFC capability in three colours—black, white and gold.

Samsung expands its iconic Note series with Galaxy Note 4

Samsung Electronics has launched the new Galaxy Note 4 in India. Blending an enhanced S Pen with a superior viewing experience, the Galaxy Note 4 supposedly provides users with a unique and powerful mobile experience in the market. It has an extraordinary 14.4 cm Quad HD (2560×1440 pixel) Super AMOLED display. The Galaxy Note 4 also sports an advanced camera.

The soft-textured back cover gives the device a luxurious finish while also providing a comfortable grip. The adaptive fast-charging feature in the Galaxy Note 4 charges the battery from 0 to 50 per cent in 33 minutes, which is 44 per cent faster than conventional charging.

HP's new ProLiant Gen9 servers will help businesses to grow in India

HP has launched a new portfolio of HP ProLiant Generation 9 (Gen9) servers that will help customers reduce cost and complexity, accelerate IT service delivery and enable business growth. The new HP ProLiant Gen9 portfolio is a major delivery milestone in HP's compute strategy, which addresses IT demands with a vast pool of processing resources that can be located anywhere, scaled to any workload and available at all times. The servers are optimised for convergence, cloud and software-defined environments, and feature new technology innovations such as HP's unique PCIe accelerators and HP DDR4 SmartMemory that increase compute capacity and converged management across servers, storage and networking to enable a software defined enterprise.
