

RHEL 7. In RHEL 6.6, support will be provided to enable a cross-realm Kerberos, through an RHEL 7 server. RHEL 6.6 will also benefit from Red Hat's 'Performance Co-Pilot' feature, which was initially introduced in RHEL 7. According to Steve Almy, the product manager for Red Hat's Platform Business Unit, Red Hat customers will now be able to monitor performance across RHEL 6 and 7 servers in a consistent manner. RHEL 6.6 will also benefit from performance improvements. Red Hat will be providing a supported container feature in RHEL 7 enabling RHEL 6 applications to run without any changes.

CyanogenMod 11.0 M11 released for supported devices

The CyanogenMod team recently announced the release of CM 11.0 M11, which has been rolled out for supported devices. The company has provided the complete change log at its blog post. The M11 builds are now available for CM-users via the CM updater app on Android devices, over-the-air (OTA). Users can even install it manually from the CM Downloads website. Since the builds are still under the release process, it might take some time for a specific build, based on the device model, to appear. As far as Android 4.4.4 is concerned, CyanogenMod 11.0 M11 has been successfully released for more than 80 Android devices and their variants.

SUSECon 2014 to highlight advances in enterprise Linux, the cloud and in storage technologies

SUSE has announced the sponsors, as well as the keynote and breakout session details for its upcoming SUSECon 2014 global technical conference, in November 17-21 at Orlando, Florida. SUSECon is an energetic and interactive platform for information exchange among customers, partners and open source enthusiasts. The conference, aimed at enterprise IT users, will include keynote and technical sessions, technology showcases, and opportunities to interact with business leaders, analysts, technical experts, as well as other users and solutions providers.

This year's content will highlight the latest technical advances in enterprise Linux, OpenStack cloud, Ceph storage and other open source technologies, as well as reveal the future direction of SUSE apart from unique industry insights. Michael Miller, SUSE vice president of global alliances and marketing, will host the event. Keynote guests will include James Staten, vice president and principal analyst of infrastructure and operations at Forrester Research, and Nils Brauckmann, president and general manager of SUSE. There will also be plenty of interviews with customers and sponsors. SUSECon breakout sessions will feature compelling technical content presented by SUSE engineers and product managers, SUSE customers and partners, and community enthusiasts. A full session catalogue is now available. The wide range of sessions will address new and existing technologies, customer scenarios and deployments, and how-tos for the implementation of Linux and cloud technologies.

Are You In Suspense?

Are you wondering what happened to your order or payment, even after a fortnight? But did you mention your name and address clearly while sending payment, and what the payment was for?

We get several payments every month without adequate instructions or even identity of the person sending the payment. As a result we are unable to take appropriate action on these, till we get a complaint - if at all.

At EFY, we want you to be our satisfied customer. So please do let us know in case your payment or instructions are not even acknowledged within a fortnight. We are not that lazy!
