

affordable, lower-end switches for homes and small enterprises. These work pretty well in a small network, but they often lack several features that you might need, which are available only in the expensive models. A few companies offer moderately priced switches but again,

their products would not have features which a high-end switch would offer. And the most expensive switches are usually difficult to configure. Considering all these issues, the best thing one can do is to keep the specifications and budget in mind when researching the product.

## Some of the best projectors available in the Indian market

### Brocade 6510

The Brocade 6510 is a 48-port, high-performance, enterprise-class switch that meets the demands of highly virtualised and private cloud storage environments by delivering market-leading Gen 5 fibre channel technology.

- **Form factor:** 1 U
- **Dimensions (W×H×D):** 43.7×4.3×44.3 cm
- **Throughput:** 128GBps
- **Number of ports:** 48
- **Speed:** 10/100/1000 Mbps

### Juniper EX2200

A carrier-class architecture, coupled with the Junos OS, enables Juniper's field-proven EX Series of switches to provide carrier-class reliability for every application.

- **Form factor:** Fixed platform, virtual chassis configuration consisting of up to four switches
- **Dimensions (W×H×D):** 44.1×4.4×25.4 cm
- **Throughput:** 24P/24T: 42 Mbps (wire speed)

### Cisco SD208P

The Cisco SD208P 8-port 10/100 switch offers the performance and ease-of-use you need to get your business connected quickly and easily. Designed and priced for small businesses that want a simple network solution, the switch works right out-of-the-box with no software to configure, and features PoE to power network attached devices.

- **Ports:** RJ-45 10/100
- **Dimensions (W×H×D):** 14×3.3×14 cm

### D Link DES-1005A

The DES-1005A 5-port 10/100 switch allows you to quickly set up a fast, reliable and efficient wired network in your home or office. Powerful, yet easy to use, this device allows users to simply plug any port to either a 10Mbps or 100Mbps network to multiply bandwidth, boost response time and satisfy heavy load demands.

- **Dimensions (W×H×D):** 190×120×38 mm
- **Ports:** 5-port 10/100BASE-T
