

Open Source India 2014-11th Edition: A FOSS Event You Just Can't Miss!

Open Source India is one of Asia's biggest conventions on open source. This year, the conference-cum-expo is being held at the NIMHANS Convention Centre in Bengaluru on November 7-8. Apart from various networking sessions and workshops, the event will host a number of tracks that will keep you updated on all that is happening in the world of FOSS.

Formerly known as LinuxAsia, Open Source India (OSI) is an industry-cum-community event where FOSS lovers and open source enthusiasts come together to share, discuss and spread knowledge on open source technologies. The event brings together stalwarts from the tech industry, not just to spread awareness and knowledge related to open source but also to share their success stories with those attending the event. The event aims to bring together IT implementers, IT developers and budding tech professionals on a single platform. Balaji Keshav Raj, director, platform strategy and marketing, Microsoft Corporation, India, who has been associated with OSI since a long time, shares his view about this event: "We have been associated with OSI as we like to interact with IT developers and implementers. Also, through this conference, we share how Microsoft handles

work beautifully on the cloud platform. I am constantly in touch with the organisers of OSI, and they are doing a great job!"

Highlights of OSI 2013

1. **2600 registrations:** Open Source India 2013 was jam-packed! There was an unmistakable buzz in the air as the registrations for the event crossed 2600. This is what makes Open Source India one of Asia's biggest open source conferences.
2. **64 eminent speakers:** There were more than 64 speakers who shared their valuable knowledge on the latest open source tools and also showcased what was best about the companies they worked for. These eminent personalities included stalwarts like Dr K Y Srinivasan, principal architect, Microsoft; Jacob Singh, regional director,
