

Speakers @ OSI 2013 share their experiences with us

Lux Rao

CTO, Technology Services, HP India

Association with OSI...

OSI is the largest open source forum in the country, and it brings in a lot of open source enthusiasts on one common platform. That's a compelling reason for all the vendors, developers and organisations associated with open source in some way to come and share their knowledge and expertise.

Experiences at OSI 2013...

It gets better every year. I would say that OSI has exceptional content. It values the speakers and that is why I think people want to come back to it.

Why OSI..

To put it in simple words, people should attend OSI, as they can be a part of the world developing around open source and can get to know the latest from leading experts. The event also offers tremendous potential for networking, where delegates can interact with user groups and discuss challenges, skills, techniques and why it's important to adopt open source. I look forward to OSI 2014.

Association with OSI...

I associate with OSI because it is one of the best open source conferences and I like the focus of this event. We have not just been a part of OSI but we constantly keep contributing to the magazine. We look forward to continuing our association with OSI as well as OSFY!

Experiences at OSI 2013...

The theme and agenda was good, and that's why we expected the turnout to be more. The event itself was organised and presented well.

Why OSI..

We do not have a very good open source conference in India. OSI represents emerging trends as the conference's theme, and the best thing about this event is that it does not have a static focus—it changes with the dynamic needs of what people are looking for in a conference like this. I look forward to this event.

Vidya Sakar

Engineering Manager, Dell

Vikas Jha

Director, Open Source Technology, Unitech Pvt Ltd

Association with OSI...

OSI is a wonderful platform for all the people and organisations who have implemented open source. It is our pleasure to be associated with OSI.

Experiences at OSI 2013...

I had a great time sharing my knowledge and experiences. I would want OSI to organise more networking sessions. The themes, workshops and tracks were smartly placed!

Why OSI..

OSI, because it's India's only open source conference and that, too, at such an advanced level. It is quite helpful to all the tech buffs who want to implement open source in their ventures. I will definitely be a part of OSI 2014.

Association with OSI...

Open Source India is one of the largest events based on open source. It offers the latest buzz and happenings related to FOSS. I get the opportunity to share my inputs on implementing open source.

Experiences at OSI 2013...

It is always a pleasure to be a part of knowledgeable conferences and especially at OSI, as it is a platform where the open source community comes together.

Why OSI..

Like I mentioned, OSI is one of the largest events based on open source and it gives me great pleasure to be a part of it. I have higher expectations from OSI 2014 and I look forward to it.

Rajiv Papneja

Chief Operations Officer, ESDS
