

YOU SAID IT

Subscribing to OSFY

Here's saying 'Hi' to the OSFY team. I have always loved the content of your magazine, since the days when it was called LFY. However, I never subscribed to the magazine at any time, but would pick it up at libraries. Now, I want to subscribe for it. Also, from the Q&A section in your magazine, I have learnt that OSFY is available as an ezine too, which suits me. Can you please let me know how I can subscribe to just the ezine but not the paper version, as I am a little uncomfortable with collecting paper stuff.

A suggestion to start a series for Linux admins

First of all, hats off to the wonderful job you guys are doing at OSFY. I have been a reader of OSFY (earlier LFY) for the past four years. I have enjoyed each and every edition of the magazine. However, I would like to make a suggestion. Why don't you start a series on scripting, for Linux admins? I am sure it's a subject any Linux admin would be eager to learn about. Do consider starting a 'Learn Perl' series for Linux admins in coming editions of OSFY—maybe it could start with the basics and lead us on to advanced topics.

—Jayakrishnan

jayakrishnanill@gmail.com

ED: Thanks for your appreciation. Such feedback really helps us to improve the quality of our content. We agree with you, that a series on scripting using Perl or Bash will be an interesting topic for sysadmins. We are already working with one of our regular authors on such a series. So expect to see articles on scripting soon. Feel free to get back to us for any other suggestions or feedback.

Getting an old issue of OSFY

I want to buy the May 2014 issue of Open Source For You. How can I get it now? I am from Pune. Please do help me.

ED: Thanks for writing in to us. You can drop an email to support@efyindia.com or call us at 01126810601.

A request for Back Track Linux

Greetings to the OSFY team. I am a big fan of your magazine and also love the Linux distros that come with the DVD. I have one request. Could you provide Back Track Linux with the DVD since I have heard that it is a very powerful distro? Thanks in advance.

—Parveen Kumar

<parveen199214@gmail.com>

ED: We are pleased to know that you like the distros we feature on the DVD. Regarding Back Track, it is no longer being maintained. The updated version for penetration testing is now known as Kali Linux, which we bundled with the April 2014 issue of OSFY. This month, we are offering BackBox 4.0 with our magazine, which you will enjoy getting your hands on.

Writing for OSFY

I am a great admirer of open source software and projects, and OSFY has really helped me to get a clearer understanding about the innovations in this field. I eagerly look forward to each issue of your magazine. Recently, I came across Real Time Operating Systems and learnt about their importance. It would be great if you included some content on this topic in the magazine.

—Adhira Lekshmi

athiralek@gmail.com

ED: We are glad that our content is useful to you and we value your feedback. We surely will include articles related to Real Time Operating Systems. You, too, are welcome to contribute content on the subject. Keep reading OSFY!
