

Zebra's next-gen tabletop printers can operate via the cloud

Zebra Technologies Corporation has launched its new ZT400 series of mid-range printers. The ZT400 series was created in response to changing end-user needs, and comes with enhancements like its Link-OS capabilities and an easy-to-use interface.

The ZT400 series of printers are easy to integrate and manage as Zebra's Link-OS environment allows the individual or an entire network of printers to be conveniently maintained and managed from any location around the globe, via the cloud. These printers have failover compatibility between Ethernet and Wi-Fi, and with their improved durability, operational downtime is greatly reduced. Additional benefits include an extensive range of connectivity options, and advancements to the print speed and quality. With greater application flexibility and increased efficiency, the ZT400 printer affords businesses greater control over their assets, people and transactions, and better end-to-end visibility. This assurance of quality, coupled with their rugged durability, makes the ZT400 series printers ideal for deployment in the manufacturing, transportation and logistics, healthcare and retail industries.

A USB pen drive that's resistant to shock, impact and boiling water

Om Nanotech Pvt Ltd has launched the Z-Commando pen drive as the latest addition to its range of Ziprem storage products. It is probably India's first shock, impact and boiling water-resistant USB device. The stylish and sturdy 16GB pen drive can withstand all types of rough handling. So you don't need to fear losing important data if you accidentally drop your pen drive into a hot cup of tea, or if you get drenched in the rain with the pen drive in your pocket. It has been specially strengthened to absorb all kinds of reasonable physical shocks and pressures, while keeping the data safe. The performance parameters of the pen drive are at par or even better than the leading brands in the market, according to company sources.

Skullcandy's new Sport Performance collection for competitive athletes

Skullcandy, the original performance and lifestyle audio brand, recently unveiled its Sport Performance line called PUSH PLAY, and named Brandeyes Distributors its exclusive distribution and marketing partner in India. Designed and tested by the most demanding competitors in the gym, on the field, the slopes and in the street, the Skullcandy Sport Performance earphones are designed to stay in the ear - no matter what. They offer stability for the toughest athletes, who not only enjoy pushing limits but also understand the power of music to enhance performance. The Sport Performance collection consists of two styles - the Method and the Chops Buds - each designed to deliver music and motivate to perform at the highest level. With a lightweight durable construction, sweat-resistant materials and Sticky Gels (a proprietary innovation that makes the ear gels 30 per cent more secure than standard gels when you sweat), Skullcandy's Sport Performance collection ensures that the ear-buds not only stay in place during the most intense workouts, but also deliver excellent sound quality.

Skullcandy's Sport Performance collection boasts of additional product features and technologies that appeal to all types of athletes, including off-axis and fixed technologies, which provide an angled port that fits into the ear better than standard buds and an optimised shape to create a secure fit.

Price: ₹ 2,499 for Method and ₹ 1,299 for Chops Buds
