Figure 6: IBM Worklight

Figure 7: A simple calculator

Figure 8: The running app

Step 3: Right click on the `mohit_android` folder (under the `Apps` folder); go to `Run` and then select `Run on Worklight Development Server`.

Step 4: After the successful build, right-click on the newly created `Mohit_android_AppAndroid` (it may be a different name, sometimes) Android project. Select `Run As > Android Application` to launch it on the emulator, and verify if it works. Figure 8 shows the app is running successfully.
