Figure 2: Preinstallation check

a welcome screen. Choose the language you want to continue in and click **Start Installation**.

- On clicking 'Accept' in relation to the terms of the GNU General Public License, a pre-installation check will be performed. This should be all green if the WAMP server was installed successfully. If the **Next** button appears, it means you have met the requirements; otherwise, please check the manual of LimeSurvey (<http://manual.limesurvey.org/Installation>).
- In the database settings, most of the fields will be filled by default. Just provide a valid database name (e.g., survey00, questionnaire, etc).
- After this, an administration panel will come up. Just fill in the desired settings and continue.

Note: If you don't have any prior experience with MySQL, just keep the fields for 'Database User: root' and 'password' blank.

Question groups and types

LimeSurvey provides you an easy way to manage questions, by grouping

the questions under certain categories. Each question group must contain at least one question.

It gives you a choice of more than 20 question types. To name a few:

- List (Dropdown)
- List (radio)
- Arrays
- Files
- Ranking
- Text display
- Multiple choices (check boxes) and many others.

For questions like *List* and *Multiple choice*, you need to provide options that are referred to as sub-questions in LimeSurvey. It also provides you a way to add *Other options*, which is often required while making surveys.

Managing conditions

LimeSurvey is capable of arranging dynamic or intelligent surveys. Conditions are used to determine whether a question will show up or not. Every question can be made to appear when it satisfies all its prior conditions.

Exporting responses

LimeSurvey allows the administrator to get responses in one place by providing support for exporting the responses in formats that those in the industry are familiar with. Responses of LimeSurvey can be exported in the following formats:

- CSV
- Microsoft Excel sheets
- PDF
- HTML
- Microsoft Word documents

Analysis of responses

LimeSurvey also provides ways of analysing all your responses and viewing graphs. It allows users to see which options have been selected, and by what percentage of the respondents. These analytics can help the organiser of the survey in various
