

Here's what's new in Linux 3.16

The founder of Linux, Linus Torvalds, announced the release of the stable build of Linux 3.16 recently. This version is known as 'Shuffling Zombie Juro' for developers. There are a host of improvements and new features in this new stable build of Linux. These include new and improved drivers, and some complex integral improvements like a unified control hierarchy. This new Linux 3.16 stable version will be ideal for the Ubuntu Linux Kernel 14.10 LTS version users will get this update once the 14.10 kernel is released.

Shutter 0.92 for Linux released and fixes a number of bugs

Users have had some trouble using the popular Shutter screenshot tool for Linux owing to the many irritating bugs and stability issues that came along. But they are in for a pleasant surprise as developers have now released a new bug fix for the tool that aims to address some of the more prominent issues. The new bug fix—Shutter 0.92—is now available for download for the Linux platform and a number of stability issues have been dealt with for good.

Open source community irked by broken Linux kernel patches

One of the many fine threads that bind the open source community is avid participation and cooperation between developers across the globe, with the common goal of improving the Linux kernel. However, not everyone is actually trying to help out there, as recent happenings suggest. Trolls exist even in the Linux community, and one that has managed to make a big impression is Nick Krause. Krause's recent antics have led to significant bouts of frustration among Linux kernel maintainers. Krause continuously tries to get broken patches past the maintainers—only his goals are not very clear at the moment. Many developers believe that Krause aims to damage the Linux kernel. While that might be a distant dream for him (at least for now), he has managed to irk quite a lot of people, slowing down the whole development process because of the need to keep fixing broken patches introduced by him.

CALENDAR OF FORTHCOMING EVENTS

Name, Date and Venue	Description	Contact Details and Website
4th Annual Datacenter Dynamics Converged. September 18, 2014; Bengaluru	The event aims to assist the community in the data centre domain by exchanging ideas, accessing market knowledge and launching new initiatives.	Praveen Nair; Email: Praveen.nair@datacenterdynamics.com ; Ph: +91 9820003158; Website: http://www.datacenterdynamics.com/
Gartner Symposium IT Xpo, October 14-17, 2014; Grand Hyatt, Goa	CIOs and senior IT executives from across the world will gather at this event, which offers talks and workshops on new ideas and strategies in the IT industry.	Website: http://www.gartner.com
Open Source India, November 7-8, 2014; NIMHANS Center, Bengaluru	Asia's premier open source conference that aims to nurture and promote the open source ecosystem across the sub-continent.	Omar Farooq; Email: omar.farooq@efy.in ; Ph: 09958881862 http://www.osidays.com
CoBit November 12-14, 2014; BIEC, Bengaluru	This is one of the world's leading business IT events, and offers a combination of services and benefits that will strengthen the Indian IT and ITES markets.	Website: http://www.cebit-india.com/
5th Annual Datacenter Dynamics Converged; December 9, 2014; Riyadh	The event aims to assist the community in the datacentre domain by exchanging ideas, accessing market knowledge and launching new initiatives.	Praveen Nair; Email: Praveen.nair@datacenterdynamics.com ; Ph: +91 9820003158; Website: http://www.datacenterdynamics.com/
Hostingcon India December 12-13, 2014; NCPA, Jamshedji Bhabha Theatre, Mumbai	This event will be attended by Web hosting companies, Web design companies, domain and hosting resellers, ISPs and SMBs from across the world.	Website: http://www.hostingcon.com/contact-us/

According to Sousa, the Shopping Lens implementation "...contravened a 1995 EU Directive on the protection of users' personal data." Sousa had provided a number of instances to put forward his point. Initially, Sousa began by reaching out to Canonical for clarification but to no avail. He was finally forced to file a complaint with the Information Commissioner's Office regarding his security concerns. Finally, the ICO responded to Sousa's need for clarification by clearly stating that the Shopping Lens feature complies with the DPA (Data Protection Act) very well and in no way breaches users' privacy.

Oracle launches Solaris 11.2 with OpenStack support

Oracle Corp recently launched the latest version of its Solaris enterprise UNIX platform: Solaris 11.2. Notably, this new version was in beta since April. The latest release comes with several key enhancements—the support for OpenStack as well as software-defined networking (SDN). Additionally, there are various security, performance and compliance enhancements introduced in Oracle's new release. Solaris 11.2 comes with OpenStack integration, which is perhaps its most crucial enhancement. The latest version runs the most recent version of the popular toolbox for building clouds: OpenStack Havana. Meanwhile, the inclusion of software-defined networking (SDN) support is seen as Oracle's ongoing effort to transform its Exalogic Elastic Cloud into one-stop data centres. Until now, Exalogic boxes were being increasingly used in the form of massive servers or for transaction processing. They were therefore not fulfilling their real purpose, which is to work
