

Now, revel in Jabra's new headset—CLEAR

Jabra, a GN Netcom brand, has introduced two new 3.0 mono headsets in India called Jabra CLEAR and Jabra TALK. Jabra CLEAR allows users to free up their hands to browse, play, swipe and text besides talking wirelessly and listening to music. Ralph Ede, managing director (South Asia), GN Netcom (S) Pte Ltd, said, "Multi-tasking and traffic police penalties are a major issue for the youth in India. Jabra CLEAR is a good option that helps them manage their lifestyle easily." Jabra's multi-use technology allows people to pair up the headsets with two Bluetooth devices. Users can pair up these headsets with two phones or with one phone and one music player. Jabra CLEAR has a sleek and shiny exterior that comes in a choice of two colours, black or white. The lightweight design, combined with Ultimate Comfort Eargels, makes for a secure fit. Jabra CLEAR is equipped with a portable car charger that allows you to charge your smartphone as well.

The headset is HD voice ready. This feature ensures that your conversations sound as natural as if you were standing right next to the person you are talking to. As and when the mobile operators start offering high-definition (HD) voice on their networks, the headset will be able to deliver rich, crisp and clear HD voice with just a simple software upgrade, whereas Bluetooth products from other brands would require hardware changes to achieve the same results. Jabra CLEAR offers 6 hours of talk time and 8 days of standby time.
