QBurnst | Trivandrum, India

QBurnst offers a diverse set of Android services to its clients. These include: location-based services, Near Field Communications (NFC), augmented reality, core animation, open GL, and audio/video recording and streaming.

Leading clients: A few of the company's premium global clients include Peugeot (the major car manufacturer); the Department of Tourism and Commerce, Marketing (Dubai); Primera Hora (the popular Spanish Newspaper), and Ingogo (the leading taxi booking system in Australia).

USP: QBurnst uses agile iterative development methodologies, such as SCRUM, for application development. The company uses Web-based project management and collaboration tools such as Trac and Redmine to ensure projects stay on track. Clients are given access to these tools so that they remain updated on the project status as the company's experts design, develop, test and deliver applications. Best practices such as continuous integration, unit testing and frequent releases are followed.

Special mention: QBurnst has been ranked fourth among the best Android development companies by Best Web Design Agencies. QBurnst is also featured in the top Android & iPhone Developers Matrix by US-based Sourcingle.
