

With Android Smart Stick, convert your TV into a smart TV

Hearing a lot about smart TVs these days and getting tempted? While the price may keep you away from making the investment, what if you were told that you could convert your regular TV into a smart TV? Micromax has launched the Micromax Smart Stick, which is basically a dongle that runs the Android Ice Cream Sandwich OS.

Mukesh Gupta, director, Micromax Informatics Ltd, said, "The Smart Stick brings the Android experience to your television screen. With this stick, you can enjoy the Internet on any TV set that has the HDMI port functionality." The stick has a standard HDMI interface, along with a USB host. Micromax's Smart Stick has 4 GB of flash memory, as well as Wi-Fi Direct connectivity. You can also connect it using a wireless mouse and keyboard, which can operate on the 2.4 GHz wireless frequency. The Android Smart Stick has been priced at Rs 4,990. The company is also offering a BluRay player supporting both 2D and 3D audio/video formats.

Samsung brings out an Android-powered Galaxy camera

The Samsung Galaxy camera is the latest and most unexpected device from Samsung's kitty. The camera runs Android's latest 4.1 a.k.a. Jelly Bean OS. It has a 16 MP sensor with a 21x zoom lens, and features a 12.1-cm (4.8-inch) HD LCD screen.

The camera is wireless-enabled, which makes loading applications for photo-editing and sharing easier. The Galaxy camera also includes a set of 35 photo editing features through the 'Photo Wizard', which allows professional quality edits, on the go. The camera's 'Auto Cloud Backup' feature saves photos onto the cloud via Samsung's AllShare automatically, the moment they are captured. The Galaxy camera comes with two connectivity options: a 3G version with Wi-Fi and a 4G version with Wi-Fi. The company has not shared any information on the pricing of the Galaxy camera as of now. The camera has been unveiled by the company in a recent press meet and will be available in the market in November.

Price: Yet to be revealed

Micromax adds 'Funbook Talk' to its tablet range

Micromax has added another device to its Funbook collection of tablets with its latest budget Android offering, the Funbook Talk. This device comes preloaded with Android 4.0 a.k.a. Ice Cream Sandwich and sports a 17.7-cm (7-inch) capacitive TFT LCD display with an 800x480 pixel resolution. The tablet is powered by a 1 GHz processor with 512 MB of RAM.

As the name suggests, the tablet doubles up as a phone, thanks to built-in voice calling and 2G connectivity support. This is the first tablet from the company to do so, with earlier Funbook tablets supporting 3G via USB dongles. It also has a mini HDMI port.

The tablet features a VGA front camera and comes with a 2800 mAh battery, which the company claims has up to 5 hours of talk time. The Funbook Talk has 4 GB of internal storage with expansion options up to 32 GB via a microSD card. Connectivity options include Wi-Fi and 3G dongle support via USB 2.0.

Funbook Talk features a host of apps for media, education and social networking. The tablet supports a variety of audio and video formats, and also has a TV mode to stream live television. Educational apps on the device offer study material for primary classes as well as papers for medical, engineering and MBA exams. There are video tutorials too. Rajesh Agarwal, managing director, Micromax Informatics Ltd, said, "This launch has been timed to attract the buyers during the festive season. We are expecting a major increase in the sales of tablets during that period."
