

YOU SAID IT

On changing the name of your magazine!

I was quite disappointed when I came to know that the magazine's name had been changed from *LINUX For You* to *Open Source For You*. I understand that nothing else has changed except the name, but it still seems that something is missing. I agree that the magazine delivers a lot more than Linux, but I somehow feel that the original flavour of the magazine is missing as you have removed the word 'Linux'. Don't forget that *LINUX For You* has given lovers of open source a lot to cherish.

I feel you should have taken your readers' feedback in the form of a poll on Facebook. I can bet that the percentage for OSFY would be negligible compared to those rooting for LFY. All the best!

—Adarsh Singh
 addi_adarsh@yahoo.co.in

ED: Thank you for your candid feedback. We appreciate your sentiments too. This decision has not been easy for us either—but based on reader surveys (current readers and those who do not read LFY), we realised that we could make an impact on a much larger population of readers by switching the name.

We did do quite a few surveys on our Facebook page and repeatedly found more 'likes' than 'dislikes'. Having said that, we do not want to ignore the sentiments of loyal readers who 'disliked' the change in name, but would like to retain their continued support for OSFY, which will have an increased number of pages (and soon perhaps an additional CD too) to reach out to the growing population that uses Linux—Android. We look forward to your continuing support.

Accessing archives of the CodeSport and JoP columns

I am a regular reader of OSFY and I find columns like *CodeSport* and *The Joy of Programming* interesting. I would like to have access to the archives of these columns. Please guide me on how I could go about it.

—S Kannan
 kannan.s3@gmail.com

ED: It's great to hear that you like these columns. To read our previous issues, you can access our ezine, which I'm sure you will enjoy. For OSFY subscribers, the ezine service is free. You can check the details on <http://ezines.efyindia.com/>. Please do write to us at osfy@efyindia.com if you have any further queries.

Make Linux popular

I am not a regular reader of your magazine, though I tend to pick it up from the stands whenever I find any article of interest. After reading an issue of OSFY, I came to know that the Zorin distro is

the OS for those who want to make a transition from Windows to Linux. I would like to request the OSFY team to provide the said OS image in the DVD for all those who want to try it out.

The only reason why Linux is not popular among the general populace is because it is not user-friendly. Even installing an application is a tedious task in Linux, whereas it requires just double-clicking to install applications in Windows. To popularise Linux, I would suggest that keyboard shortcuts in Linux should be similar to those in Windows. Of course, there are some shortcuts that are similar to both Windows and Linux like Ctrl+C, Ctrl+X, Ctrl+V, etc. But there should be more similarities to make the learning easier.

Could you also feature a list of software that works on Windows and its equivalent in Linux, on your website? I am sure that would go a long way in popularising Linux.

Keep up the good work!

—Priyam Haobam,
 pritamhaobam@yahoo.com

ED: We really appreciate you sharing your views on how to popularise Linux. Our readers will definitely find your suggestions helpful. And we will certainly try to incorporate them in our future editions; just give us a little time to work on them. Till then, please feel free to send in more ideas, suggestions and comments at osfyedit@efyindia.com

Include articles on DNS configuration

I have been reading LFY (now OSFY) for the last couple of months. Being a Linux administrator, I must say that your magazine has played a key role in shaping my career and still continues to do so. I am sure that OSFY will continue to enthral its readers in the future too. I would sincerely request you to include articles on mail servers and DNS configuration in Redhat5 Enterprise Edition, in any one of the upcoming editions of OSFY.

—N B Riaz Ahmed,
 nbriaz@rediffmail.com

ED: We are delighted to get such wonderful feedback from you and discover that our magazine has been a great help in your career. Your suggestions have been taken into consideration, and we will certainly try to include articles on mail servers and DNS configuration in our forthcoming editions. With your experience as a Linux admin, you too could consider writing for us. To do so, you need to send us a detailed Table of Contents (ToC) on the topic you wish to cover at osfyedit@efyindia.com. Our editorial team will review the ToC and once they give you a thumbs up, you can go ahead with the article.
