Prabhu Pethuri
I need to know the vi editor shortcuts for all distros.. please help
Like · Comment · 24 October at 17:19

Ashish Negi i think that basic commands of vi editor (its internal ones) are distro independent
24 October at 17:35 · Like

Ashish Negi you can go to stackoverflow.com and search vim and emacs commands too colof

can any1 tell me...which is da best processor...."corei7" or amd processor?????in pc
Like · Comment · Sunday at 12:05 ·

Dale Arends likes this.

Dale Arends In terms of speed the i7 is still the fastest. Maybe after more motherboard and software support is available for the AMD FX "Bulldozer" 8-core series processor. The AMD FX series is was mainly built for servers and is heavily threaded but ...

Dale Arends If you're on a budget get yourself an AMD Phenom II X6 or X4 with 6MB L2 cache on a nice mobo and good power supply and use at least 8Gb 1600Mhz RAM and overclock it. It'll be fast.
