

Mani Kiran
how to dual boot (installation) Ubuntu 11.10 (oneiric ocelot) alongside fedora 15?

Like · Comment · 04 November at 15:51 · 0

Sandeep Reddy first install fedora and then install ubuntu in free space. ubuntu will take care of everything for dual boot.....

Help !!
I have 2 HDD and in one i installed Windows which i don't use other's at home use that. and other in which i have installed Ubuntu... Now i want to install other linux distro like Mint, Suse and Fedora . how can i install all these linux in same hdd wether linux is installed...and can have a booting option at the boot time...i don't want to install side by the windows sys...and nor my memory support virtual machine (Vm-box..)
