

Five Android office suites for your smartphone

Apart from the host of other activities that its apps allow you to perform, now you can also work on your office files using your Android smartphone. A variety of office suites have been made available for Android devices, which will help you work while on the move. Some of these office suites are Documents To Go, OfficeSuite Pro, Quickoffice Pro, Smart Office and ThinkFree Office Mobile. These include a word processor, spreadsheet application and presentation maker, and even support document file compatibility with Microsoft Word (.DOC, .DOCX), Excel (.XLS, .XLSX) and PowerPoint (.PPT, .PPTX). However, these are all paid apps. The service for the Google Docs Android app version is free, but comes with its own set of limitations.

Google Nexus S controls robot on Space Shuttle

NASA sent two Android-powered Google Nexus S smartphones into space with the last manned space shuttle, *Atlantis*, on the STS-135 mission. The smartphones were used to test and investigate how humans and robots can co-exist in space more efficiently. NASA is hoping that these experiments will lead to implementing robots to complete some routine tasks normally done by astronauts. The Android phones help the robotic satellites perform tasks the astronauts used to do, like recording sensor data and capturing video footage. The device is still awaiting its Android 4.0 Ice Cream Sandwich update. Several Nexus S handsets are being used in experiments by NASA, and in August, many of these devices were sent into orbit on *Atlantis*. According to NASA officials, Nexus S was chosen for the program because of its easy hardware and software customisation.

Norton Tablet Security for Android launched

Symantec has released a new security product specifically designed for Android tablet users - Norton Tablet Security. This will support tablets running Android 2.2 or higher versions (including Android 3.0 Honeycomb). With Norton Tablet Security, your Android tablet is now safeguarded with anti-malware, anti-theft, Web protection and tablet-optimised UI features.
