

# YOU SAID IT

## Android-related content rocks!

I am working as a software programmer and have been a regular reader of *LINUX For You*. Recently, I read the article 'Android Application Development: Hardware and Sensors', written by Saketkumar Srivastav, published in the October 2011 edition. The article helped me to learn a lot about the subject. Incidentally, I discovered that I had missed out on the previous four parts of the article series on Android app development. It would be a great help if you could send to me copies of these articles in digital or hard-copy format. I am very eager to read these.

—Arun Simon,  
arunsimon2007@gmail.com

I have been reading *LFY* since the last two editions, and can happily say that I have really learnt loads from it. The articles are very informative and the puzzles are too good.

A special mention goes to the 'Codesport' column, which I really like!

I have a request. I came across an excellent article on Android app development in the October 2011 issue of *LFY*, but it was the fifth part of a series. Since I am a new reader of *LFY* and am extremely interested in learning more about app development for Android, I would really appreciate it if you could provide me with all the previous articles in this series.

—Ankit Sharma,  
ankit.bittu@gmail.com

**ED: To Arun and Ankit:** We are thrilled to hear that you enjoyed reading the articles published in *LFY*! We will definitely share

your feedback with our authors. It is interesting that both of you particularly liked the article on Android app development.

We regularly publish most of the magazine's content online on [Linuxforu.com](http://Linuxforu.com). Hence, you can read the previous parts of the Android app development series, online.

You just need to type the name of the author (Saketkumar Srivastav) or the name of the series (Android App Development), to access the rest of the articles. Hope this simplifies your online search.

If you subscribe to the magazine, you can also access the *LFY* eZine version, which is a facility provided to all our subscribers for FREE.

*LFY* issues from January 2011 onwards are available in the eZine format. Do let us know in case you need further assistance.

## Request for UNIX/Linux distro DVD

I have a suggestion to make. I feel every issue of *LFY* must be bundled with at least one DVD of a UNIX/Linux distribution.

—Aniket Gole,  
roshan@3133@rediffmail.com

**ED:** We feel the same! Which is why every edition of the *LFY* print edition does come bundled with a free DVD, which carries the latest live and bootable versions of open source distros, tutorials, ISO images of distros, and so on.

Maybe you could consider subscribing to the magazine (link to subscribe: <http://electronicsforu.com/electronicsforu/subscription/subsc2scheme.asp>) or you could grab a copy from your nearest newsstand. That way, you are sure to get your hands on the free DVD we bundle with every issue.

Let us know if you require any further assistance in this regard.

## Praise for Nagios-related content... and a few suggestions

I am a regular reader of *Linuxforu.com*. I was searching for a 'How To' article on Nagios and found a useful article on the *LFY* website titled: 'The Perfect Prefect'.

I would like to thank you all for posting such useful content.

I also have a few suggestions to make. The content would be more understandable if you could add some more screen shots in the tutorials to aid and improve the learning experience of readers like me.

I also want to share a concern. I faced a few issues in understanding the technical terms used in the Nagios article. It would be really helpful if you give a brief intro about the technical terms used in the articles.

—Karthik,  
karthikmbc@gmail.com

**ED:** We are pleased that your search yielded successful results on our Web portal and that you found the article on Nagios useful.

Thanks for your valuable suggestions and for sharing your concerns with us. We will convey your feedback to the author. Also, we will try to ensure that the future articles published in the magazine are simplified to help enhance the learning experience for our readers.

## Praise for the Lisp series continues...

I have been following the Lisp articles in *LFY* since the first edition. They are really good and written in a very humorous style. My wife keeps asking
