

YOU SAID IT

me how I can laugh so much while reading an article on technology! Thanks a lot for including this in the magazine.

—Sid Haley,
sid.haley@technologist.com

ED: It's a great feeling for the entire LFY team to read feedback such as yours. We will surely convey your words of appreciation to the author of the Lisp series. Do keep reading the magazine and sharing your feedback with us.

Regarding the KSEB case study

I was really glad to read the case study on FOSS adoption by the Kerala State Electricity Board (KSEB) published in the September 2011 edition of LFY.

It's not just a cost-cutting initiative from KSEB but a big time example for other government organisations to follow in migrating from their existing proprietary infrastructure to FOSS alternatives.

I would also like to draw your attention to an error in the article. In one place, it stated, "...industry-known proprietary databases like SQL Server, Oracle and MySQL," Sathyaraj asserts..." I would like to point out that unlike SQL Server or Oracle, MySQL is a totally open source powered database server.

—Vikas,
vikas@mybluegene.org

ED: We are glad that you liked reading the KSEB case study. Your point about the MySQL database is absolutely correct. It is indeed an open source database. We regret the factual error made in the case study.
