

```

a>
    </p>
  </div>

  <!-- illustrates creating a link using a URI field -->
  <div tal:condition="nocall:context/blog">
    <p><label>Blog</label>
    <a tal:attributes="href string:${context/blog}"
       tal:content="string:${context/blog}"><link</a>
    </p>
  </div>

  <!-- Illustrates creating a URL from image object -->
  <div tal:define="picture nocall:context/picture"
       tal:condition="nocall:picture">
    <img tal:attributes=
       "src string:${context/absolute_url}/@@download/
       picture/${picture/fileName};"
       style="float:left;" />
    </div>

  <!-- illustrates displaying a rich text field -->
  <div>
    <label>Profile</label>
    <p tal:content="structure context/profile/output" />
  </div>

```

```

</tal:main-macro>
</metal:main>

```

The hardest part in the template is to display the image. Since the image is stored in the database, it has to be constructed into a URL, and the *img* tag with *src* attribute created. *Context* refers to the current object, which will normally be followed by an attribute. The attribute may be followed by an operation of the attribute. The image and the URL are conditionally shown if the respective objects exist.

As *profile* is a rich text object, the “*output*” method converts it into HTML text. The “*structure*” option tells the system to use it as is, without escaping any characters. You can learn more about TAL and METAL at <http://docs.zope.org/zope2/zope2book/AppendixC.html>.

It's not just the templates, the code can also be as complex as you require. Virtually anything you can do with *grok*, you should be able to do in Plone. So, you have a powerful tool to create a site whose primary (but not exclusive) focus is content management.  **END**

## Calling...

# Share your knowledge

## Inviting FOSS experts to write articles on their area of interest

LFY covers a myriad of topics—network management, software development, embedded systems, community issues, and even hands-on guide for newbies. If you've got an interesting topic, let us know. Thanks to the launch of [linuxforu.com](http://linuxforu.com) we are now trying to extend our content portfolio related to Linux & Open Source.

To know more on how to become an LFY author, contact us at [lfyedit@efyindia.com](mailto:lfyedit@efyindia.com)

### Few topics that top our list:

- ◆ Tips 'n' Tricks for software developets or IT implementers
- ◆ Cool tweaks for FOSS enthusiasts
- ◆ FOSS on mobile
- ◆ Virtualisation (Implementation)
- ◆ OpenJDK or Java on Linux
- ◆ OpenSolaris (software development)
- ◆ How can I do 'that' on Linux
- ◆ Reviews of latest open source projects & tools
