

# CODECHEF

The CodeChef.com Challenge, your monthly dose of coding puzzles from India's biggest coding contest, is now in print!

*H*ello and welcome to the *CodeChef Puzzle Challenge* sponsored by *LINUX For You and Directi!* Let's see how many of you can solve this month's puzzle and go on to become one of the three lucky winners to bag some awesome prizes, both in cash and merchandise!

## The November edition's puzzle

In an ancient kingdom, a known thief was once convicted for robbing the jewels from the queen's crown. At the trial, the king said to him, "If you have actually managed to steal the jewels from the crown, you must obviously be a genius. However, if you haven't, then you're like any other thief and of no good to me. I'll let you prove to me which one you are, through this simple test."

The king placed him in a dungeon with two doors, each guarded by a giant guard, and said, "One is the door to freedom, the other to death. One guard tells the truth, the other doesn't. You are allowed to ask any one of these two guards only one question; and based on the response, you may figure out which door to choose."

What is the question to be asked?

## The solution

The question to be asked to any of the two guards would be: "Would the other

guard say that you are guarding the door to freedom?"

If the guard says "No," then the door he's guarding is the one to freedom.

If the guard says "Yes," then the door he's guarding is the one to death.

## How did we do it?

Such a scenario is constant regardless of the guard you ask. You can verify it through trial and error!

## And the winners this month are:

- Aditya Lele
- Deendayal
- Khan Shaffi Rafik

## Your CodeChef Puzzle of the Month

There are three boxes. One is labelled 'Apples', another 'Oranges' and the last one 'Apples and Oranges'. Each box is labelled incorrectly. You are allowed to only look at one single fruit from a box of your choice.

Based on the information available, give each box its correct label.

## Looking for a little extra cash?

Solve this month's *CodeChef Challenge* and send in your answer by December 15, 2011, to [codechef@efyindia.com](mailto:codechef@efyindia.com). You can also post your answer to the puzzle online at <http://www.linuxforu.com/codechef/>. Three lucky winners will get exciting prizes, both in cash and merchandise! 

**About CodeChef:** CodeChef.com is India's first non-commercial, online programming competition, featuring monthly contests in more than 35 different programming languages. Log on to CodeChef.com for the December Challenge that runs from December 1 to 11, to win cash prizes of up to Rs 20,000. But that's not all. Stay tuned to CodeChef and participate in the multiple programming contests that take place on the website throughout the month!
