

Meet and listen to global security gurus

Want to meet Charlie Miller? For those of you who need an introduction, Miller is a prominent researcher and consultant at Accuvant Labs. He was the first hacker to find a security hole in the iPhone and iPad, whereby an application could contact a remote computer to download new unapproved software, which could execute any command—even steal personal data, thus using iOS applications functions for malicious purposes. Miller demonstrated his hacks publicly on products manufactured by Apple.

Miller and many other global security experts will be speaking at *nullcon*—the third edition of the 4-day annual conference, to be held from February 15 to 18, 2012 at Goa. The event promises to be more exciting than ever as many industry stalwarts, including Justin Searle, managing partner at UtiliSec; Albert Hui, a security and risk strategist; Don A Bailey, a security consultant with iSEC Partners Inc; Andrew King, a security researcher for InfoSec Institute; Bishan Singh, principal security engineer at Yahoo!, and many others will be sharing innovative insights related to various aspects of information security.

Topics such as Attacking and Defending the Smart Grid, War Texting—Mechanising Machine2Machine, AV-Bypass, HaxDroid—Empowering the Android Handset, Ra.2—BlackboxDOM-based XSS Scanner, and so on are part of the content line-up.

The conference is organised by *null*, a security community in India with more than 2000 members comprising information security professionals, ethical hackers and law enforcement professionals. *null* focuses on infosec research, and in assisting government and private organisations with cyber security issues.

Talking about the theme of this year's event, Pratul Bajaj, operations head, *null*, says: "This year, the organisers at *null* decided to introduce speaker sessions and events that were closely related to real life events plaguing the IT world."

The third season of *nullcon* promises to introduce challenges like *Desi Jugaad*, which is a native version of how people apply the principles of hacking in our day-to-day life. Bajaj explains: "This year, the speakers will be introducing tools related to lock picking as the main topic for *Desi Jugaad*. Lock picking is the art of unlocking a lock by analysing and manipulating the components of the lock device, without the original key. However, there is no malicious intention of encouraging any such activity and the talks will be centered on taking care of security issues."

The other key highlight of the event this year is *Jail Break*, where the participants will be kept under house arrest for a stipulated period of time within which they will be required to find a successful solution to the problem of releasing themselves from the house. This is a skill testing challenge under high stress, limited time and resources.

So a lot of exhilarating experiences are in store for hackers, security researchers and all those who are looking for solutions related to information security. For more, refer to the official website of *nullcon*: <http://www.nullcon.net/website/>

TOP GUN TECHNOLOGIES

Best of the Best
The Best Network & Security Labs in India

Others Promise. We Deliver!

For A Highly Paid Career in India and Abroad

Special 10th Anniversary offer

CCNA	Rs. 8,000/-
CCNA Voice	Rs. 12,000/-
CCNA + CCNP-R&S	Rs. 25,000/-
CCNA + CCNP-Security	Rs. 35,000/-
CCNA + CCNP-SP	Rs. 35,000/-
CCNA + CCNP-Voice	Rs. 40,000/-

All Labs Conducted on CCIE Racks
Free interoperability labs with Juniper Devices

Congrats to our Latest CCIEs

Mr. Sivaji Pula	CCIE # 33115
Mr. Aakash M	CCIE Security # 32880
Mr. Lijo Varghese	CCIE # 32831
Mr. Biplob Pal	CCIE # 32830
Mr. Mahesh Jain	CCIE Security # 32300
Mr. Purnali Alam	CCIE # 30715
Mr. Anshu Mohan	CCIE # 30170
Mr. Pongrasath V	CCIE # 29855
Mr. Abhis Varghese	CCIE # 29835

We also Offer Specialized CCIE Training
Special 15 days Bootcamp for CCIE (R&S): Rs. 60,000/- and CCIE (Security): Rs. 80,000/-

Training Advisor
AJAY PANDEY
BE, MS(USA), LLB, CCIE # 14792 (Security) / R&S, CCSP, CISA, CISM, CCSE, MCSE, ASAP.

Lab Equipped with :
150 Cisco Routers (2811, 1841, 2621 XM, 3600, 2600, 2500, 1700, 700), 40 Cisco Catalyst Switches (5000, 3750, 3560, 3550, 3000, 2950, 2900), Frame-Relay / ISDN, 12 Firewalls: SonicWall, Watchguard, Cisco PIX 515 E (UR), ASA 5510, PIX 501, 3005 VPN concentrator, 4240, 4210 IPS sensor, Nokia IP 330, Check Point, CiscoNAP/ NICs, Cisco Call Manager, MCS 7825, Cisco IP Phones 7960, 7961.

Local Accomodation Available

We have Graduated over 85 CCIEs.
