

CODECHEF

The CodeChef.com Challenge, your monthly dose of coding puzzles from India's biggest coding contest, is now in print!

Welcome to the New Year edition of the CodeChef Puzzle Challenge sponsored by *LINUX For You* and Directi! Happy New Year to you all! Solve this month's puzzle, and you stand a chance of being one of the three lucky people who can each win a cash prize of Rs 1,000!

The December edition's puzzle

There are three boxes. One is labelled 'APPLES' and another 'ORANGES'. The last one is labelled 'APPLES AND ORANGES'. Each box is labelled incorrectly. You may have a look at the contents of only one box. Based only on the information available, can you give each box its correct label?

The solution

Let the three boxes labelled be Apples (A), Oranges (O) and Apples and Oranges (AO).

Choose to look at box (AO). Since all three boxes are labelled incorrectly:

1. If it contains only oranges, that

means Box (A) has apples and oranges, and Box (O) has apples.

2. If it contains only apples, that means Box (O) has apples and oranges, and Box (A) has oranges.

And the winners this month are:

- M S Revanth Kumar
- Bastin Joseph
- Manoj Malviya

Your CodeChef Puzzle of the Month

Jignesh can paddle his boat at 7 kmph up a river. The river flows at 3 kmph. The moment Jignesh starts to paddle up stream, a fisherman loses one of his fishing hooks in the water 14 km up stream of Jignesh. How much time does it take for Jignesh and the fishing hook to meet?

Looking for a little extra cash?

Solve this month's CodeChef Challenge puzzle and send in your answer to codechef@efyindia.com by January 15, 2012. Three lucky winners will get exciting prizes, both in cash and merchandise! You can also participate in the contest by visiting the online space for the article at <https://www.facebook.com/LinuxForYou>
