

a magic genie lamp that you rub and speak your searches into, to a modified radio microphone that, when turned on, illuminates an 'On Air' sign as you voice your queries to your computer.

The board is designed to be Arduino-compatible and completely open source, so anyone can modify it with additional components to give it their own creative spin (or even build their own version from scratch).

To let others in on the action, Breakfast will be giving away a limited run of Verbalizer kits for free. For more information, including hardware schematics, source code and a video of the Verbalizer in action, head over to breakfastny.com/verbalizer.

Here comes the non-admin Chrome Frame

The new version of Google Chrome Frame no longer requires administrator (admin) rights to be installed. First introduced in September 2009, Chrome Frame is an open source browser plug-in that brings Chrome's JavaScript engine, HTML5 and other open Web technologies to versions 6, 7, 8 and 9 of Microsoft's Internet Explorer.

Previously, users required admin privileges to install the plug-in onto their systems. While this isn't a problem for most home users, in corporate environments, most network administrators limit the system privileges of users on company machines and networks for security reasons. As such, these users have not been able to install Chrome Frame.

The new version no longer requires admin rights, allowing it to be installed in most cases. It is currently only available in the company's developer channel but it will arrive in the stable channel very soon.

Toyota joins Linux Foundation as Gold Member

Japanese automobile maker Toyota has become the Linux Foundation's newest Gold Member. Toyota says that Linux gives the company "the flexibility and technology maturity" it needs to evolve its In-Vehicle Infotainment (IVI) and communications systems. According to Kenichi Murata, project general manager for Toyota's Electronics Development Division, "The Linux Foundation provides us with a neutral forum in which we can collaborate with the world's leading technology companies on open innovation that accelerates that evolution."

Gold membership is the middle ranked tier of the Linux Foundation's three tiers of membership: Platinum, Gold and Silver. Of the approximately 100 members, there are currently a total of seven Platinum Members and twelve Gold Members including Toyota. Other Gold Members include AMD, China Mobile, HP, Google, Cisco, Nokia, Motorola, Novell and Panasonic.

IBM donates Lotus Symphony to Apache Foundation

In a move that mirrors Oracle's decision with OpenOffice, IBM has decided to donate the standalone version of Lotus Symphony to the Apache OpenOffice.org project under an Apache 2.0 licence. Rob Weir, ODF architect at IBM, says that the company will be working with the project to select the components to integrate and points out that IBM has already "...done a lot of work with

STUDY GUIDE

RHCE SERIES

LINUX ESSENTIALS SERVICES & SECURITY

LEARN BY EXAMPLE

VIPIN GUPTA

Price: US \$40, India Rs. 650/-

This study guide starts from basics & takes you to advance levels of linux. everything has been explained by giving examples. Proper lab setup along with diagrams has been given so that you can construct the labs yourself & do the practice. It covers the course contents of RHCE. It is for those who wants to start fresh as well as who have done RHCT/RHCE

It is available in ebook as well as paperback format. paperback edit on is available only through direct order. For more details visit our website or email

About Author: Vipin Gupta is BE, RHCE, CEH, ASM, CCNA, MCSE, MCSA. He has got more than 17 years of experience in IT related fields. During his long career, he has been associated with various engineering colleges, polytechnics, private institutes & corporate sector.

Courses/Workshops

- Linux Administration
- Linux Security Specialist
- LMS using Moodle
- 1-Day/3-Day/5-Day Workshops

we focus more on knowledge than on certifications

we also provide virtual classroom solutions for colleges/schools
