

YOU SAID IT

(www.facebook.com/lfy). There are over 55,000 registered fans, most of who are interested and have expertise in Linux and open source. There are chances that your queries will get addressed, instantly, by some CMS expert registered on this page.

Regarding your second request, I would suggest that you refer to the Electronics For You magazine of the EFY Group, which covers such topics on a regular basis. In fact, in the July edition of EFY, there was an article on design and simulation tools for embedded electronics devices and chips. You can consider subscribing to EFY magazine if you have interest in the field of electronics as well. Apart from this, like with LFY, there is also a Facebook page for Electronics For You. The URL is <http://www.facebook.com/designelectronics>. You can post your electronics-related queries on this page. Hope this helps!

Request for a series on Java, and a pat on the back!

I'm a student of electronics and communication engineering at NIE, Mysore. I've been a regular reader of LFY for the past one year. Through this note I would like to

acknowledge that the magazine is simply superb and is the best magazine available in India for programming related topics. Keep up the good work! May God bless the whole LFY team to come up with more interesting topics in the magazine in the future too!

I have a suggestion. Can you please begin a series of articles on Java—where concepts evolve right from the level of rookies to that of professionals? Perhaps, more and more students like me would appreciate this kind of a series on the subject, mainly because most text books present a very theoretical approach to concepts, which students like me don't like. Studying a new software tool or language from a magazine like LFY has always struck a chord with me. Life has become a lot more easy after I began reading LFY.

Once again, I would like to thank the editor and the whole LFY team for their mind blowing work!

—Vinay V S,

ED: It feels good to read e-mails like yours. Thanks a ton on behalf of the entire team of LFY for this pat on the back and your

overwhelming words of praise! We are happy that you find the content of the magazine good for programmers, especially beginners.

We have taken note of your suggestion regarding a series on Java. We will surely try to plan something on the lines proposed by you.

But till that happens, we are planning to search the magazine's archives and compile a series of articles on Java, that we have already published, as a PDF. This will be shortly uploaded online at LinuxforU.com, for you and other readers to refer to. We hope that you find this collection useful.

Do keep writing to us, with requests for what you would want us to cover in the magazine, and we will try our level best to plan our content in line with your suggestions. **END**
