

HTC Sensation launched in India

To take on the likes of Apple's iPhone 4 and Samsung's Galaxy S II, Taiwanese handset manufacturer HTC has launched its Android-based smartphone, Sensation, in the Indian market. It is priced at Rs 32,700.

The 10.9-cm (4.3-inch) qHD display delivers high-resolution widescreen viewing and gives the HTC Sensation slender proportions. At the heart of the HTC Sensation beats a 1.2-gigahertz dual-core Qualcomm processor, which will enhance the computing speed of the device.

It comes equipped with an 8-megapixel camera that has the new instant capture feature, which offers faster shutter speeds. The HTC Sensation also shoots full HD video in a resolution of 1080p, with full stereo sound, at up to 30 frames a second. With the new Video Trimmer tool, people can crop their video clips to the perfect size for easy sharing with friends and family.

YouTube 3D videos get HTML5, WebM support

Now you will be able to watch YouTube 3D videos on the HTML5 player using the WebM video codec. YouTube has been offering stereoscopic 3D as an option since 2009, but this was only available to the very few who had 3D-enabled computers. But now, Google's new partnership with NVIDIA and Mozilla will give more users the chance to imagine that they are right in the middle of all the action on screen.

You will need Firefox 4 running on hardware with NVIDIA 3DVision support and appropriate drivers and active shutter glasses; 3D video can also be displayed over HDMI 1.4 to 3D TVs when using NVIDIA's 3DTV Play software.

Jonathan Huang, 3D project manager at YouTube, says: "We're excited to introduce the thousands of 3D videos available on YouTube. By embracing these open standards, NVIDIA 3D Vision users now have a great way of experiencing YouTube's library of 3D content."

Ubuntu coming to Eee PCs

The Asus Eee PC 1001PXD, 1011PX and 1015PX will soon get Ubuntu configurations, unlike the majority of the previously-launched Eee PC netbooks which came preloaded with Windows OS. Chris Kenyon, VP of OEM services at Canonical, said, "The deal with Asus is an important one for Canonical. It will put Ubuntu in the hands of a larger audience, people who would not necessarily download Ubuntu, but would be happy to buy a computer knowing that it will work perfectly on that hardware. Also, Canonical's extensive work with manufacturers helps make all future versions of Ubuntu run perfectly on specific machines and the hardware of individual OEMs."

Stating that Microsoft is its main rival, not other Linux distributions,

Huawei brings new Android phones to India

Huawei has launched its new range of Android-powered smartphones in India, which include the Ideos X5, Ideos X2 and Ideos Chat. Both the X5 and X2 run Android 2.2

Froyo, while the Ideos Chat runs Android 2.1 and features a touch screen, Wi-Fi, a 3.2 MP camera and a QWERTY keypad.

"It is an opportune time for us to launch our new and exciting range of Ideos smartphones whether it's the X5, X2 or the Chat. We will continue to bring the latest, smartest and most technologically advanced handsets to our consumers, at accessible prices," said Anand Narang, marketing director—Devices, Huawei.

The X5 comes equipped with a WVGA display, HSDPA, Wi-Fi, GPS, a 5 MP auto-focus camera, an 800 MHz processor, and 4GB of on-board memory. The Ideos X2, on the other hand, comes with an HVGA display and a 3.2 MP camera. These handsets are now available across India, for the following prices: Rs 14,999 (Ideos X5), Rs 8,999 (Ideos X2), and Rs 8,199 (Ideos Chat).

Zarafa SummerCamp 2011

Zarafa will organise this year's international SummerCamp event on 30th June and 1st July in Kerkrade in the Netherlands, at the Rolduc conference centre. In 2010, more than 200 developers, customers, businesses and technology partners and journalists gathered in Brussels to be updated about Zarafa's growth and product vision.

This year's event will open with keynotes from the Zarafa management, followed by a keynote by Roberto Galoppini and Davide Galletti titled, 'Scoring the Zarafa Ecosystem on open source maturity, licensing, adoption and leadership'.
