

the one offered by Google," adding that, "If someone chooses to switch their ChromiumPC to run a different operating system, it's as easy as swapping out one of the three boards inside the computer."

Xi3 plans to reveal more information about the ChromiumPC—including its price—before the launch date.

## Sony's Music Unlimited comes to Android phones

Music Unlimited, Sony's digital cloud-based music service, is now available on smartphones running Google's Android system as well as on devices such as the PlayStation3, Internet-connected Sony televisions and Blu-ray players. It allows users to stream millions of songs to Sony devices that previously lacked mobile access. Monthly subscription fees start at \$3.99. The app is being made available to users in the United States, France, Germany, Ireland, Italy, Spain, Britain, Australia and New Zealand.

## Software AG acquires Terracotta

Germany-based Software AG has acquired  **TERRACOTTA**, home of open source projects such as the Ehcache Java cache and the Quartz scheduler. Founded in 2003, Terracotta is a privately held company with 55 employees in development centres in San Francisco and New Delhi.

This acquisition will allow Software AG to provide cloud solutions and increase the performance and scalability of its Business Process Excellence platform. Terracotta's product portfolio provides in-memory technology and is the de facto caching standard for enterprise Java. Terracotta's in-memory processing will provide the foundation technology for Software AG's cloud offerings.

With in-memory data access up to 1,000 times faster than database access, this will enable Software AG to increase revenue with existing and new customers through larger business process excellence projects encompassing complex event processing, mobile technology, cloud distribution and virtualisation.

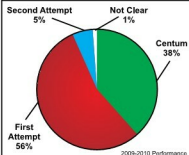

The acquisition is Software AG's first significant open source business acquisition. It also extends Software AG's business model options by adding a large and thriving open source community.

Software AG expects to release the first combined products in the fourth quarter, 2011. The company's cloud based Platform-as-a-Service (PaaS) roll-out will be in 2012.

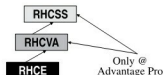

## Google to stop supporting old browsers

Google has decided to phase out support for some Internet browsers. Users of Internet Explorer 7, Safari 3, Firefox 3.5 and all previous versions will lose some functions from 1 August 2011. Access to Gmail, Google Calendar, Google Talk and Google Docs will gradually stop working and users are being urged to upgrade because of insecurities in the old browsers which could leave them prone to attack.

Venkat Panchapakesan, vice president, Engineering, Google said the move was also influenced by engineers who want to make use of the latest browser technology. Panchapakesan stated: "These new browsers are more
