

YOU SAID IT

I am studying for a diploma in .Net. I recently read the article on Lisp in your magazine and gathered that it is one of the most powerful programming languages in the world. I am keen on learning it. I wanted to know if the authors you feature can also teach the language? I am currently based in Bengaluru but can come to Delhi, if required. Please send me details about this.

—Guru Sahay,
guru-sahay@in.com

ED: Glad that you liked the article on Lisp and happy to note that it even inspired you to want to learn the language.

While we are not sure if any of the writers can help you learn the language, you can surely seek guidance from the author of the article, Vivek Shangari. You can also post this query on the Facebook page of LFY (<http://www.facebook.com/LinuxForYou>). Over 53,000 people comprising Linux and open source experts and enthusiasts are members of this fan page. There is a good chance that your query will get addressed by some Lisp expert or training institute that has a related program!

Thanks for including a beautiful article on Lisp in the June 2011 edition of LFY. It felt like a breath of fresh air. My husband and I are ardent readers of *LINUX For You*. The reason is obvious—articles like these make this magazine stand out in the crowd. I am a PHP programmer but the author has inspired me enough to try out Lisp. Keep up the good work, Team LFY!

—Aashritha Gupta,
Aashritha@engineer.com

ED: Dear Aashritha, we are thrilled to read your e-mail! Many thanks for your praise for 'Lisp: The Tears Of Joy'. We shared your words of appreciation with Vivek Shangari, the author of the article, who in turn, sends his thanks to you.

Please do keep reading LFY and sharing your views and suggestions with us on how we can improve further. Thanks again for making the time to share your positive feedback!

Request for Python PDFs as part of the LFY DVD

I regularly follow the articles on Python in your magazine. Why don't you provide PDFs of all the articles related to the topic, which have been featured so far in LFY? It will take just around 10MB of space.

Kindly consider providing these PDFs in the magazine's DVD.

—Venkata Ramarao,
raosoft27@yahoo.com

ED: Thanks for writing to us. Your suggestion is a good one. We will surely evaluate the feasibility of bundling the article series on Python in the LFY DVD. We look forward to more such thoughts, suggestions and ideas from you, for the magazine's overall improvement.

About a few installation glitches in Igelle

I was surprised to read about Igelle in the current issue of LFY, which is not based on any other grand distro. I downloaded the ISO file and could install it easily. The 'one-click' install of app is pretty good. Unfortunately, the installation

failed to detect other OSs in the hard disk. The author of the article should have mentioned something about this important aspect. Perhaps I should have referred to the installation information available on the Internet before going this far.

Earlier, I could make the changes in the 'menu.lst' file but with Igelle, I find that 'menu.lst' is actually the one created by Anaconda. I would like to know if anyone has found the equivalent of 'menu.lst' in Igelle.

Actually, I have downloaded nearly 1 GB of software, which will go waste if multi-boot is not possible. However, I could locate the 'grub.cfg' file, but the changes made were not of any help.

—V S Nagasayanam,
vsayanam@gmail.com

ED: Thanks for writing to us. As regards this query related to Igelle, I would suggest that you post it on the Facebook page of *LINUX For You* (<http://www.facebook.com/LinuxForYou>), which is followed by many Linux and open source experts. It is likely that your query will get addressed by some expert.

In the meantime, we have referred the query to our tech team, as well as the author. You will soon hear from us.
