

Talend becomes Apache Software Foundation sponsor

Talend, the open source data integration company, has become a bronze sponsor of the Apache Software Foundation (ASF). The sponsorship of the non-profit, volunteer-run foundation will help aid organisational, legal and financial support for a broad range of Apache-licensed projects. Current sponsors of the foundation include Google, Yahoo! and Facebook.

"The Apache Software Foundation has made tremendous contributions to the open source ecosystem since 1999," said Fabrice Bonan, co-founder and chief operating officer, Talend. "Apache CXF and other projects, since their earliest days, have relied on Apache infrastructure and governance. The entire community benefits tremendously from ASF support, and Talend is pleased and proud to join ASF as a sponsor."

Verizon recognised for innovation in use of open source solutions

In the 2011 Red Hat and JBoss Innovation Awards competition, Verizon won in the Superior Alternatives category. The award, announced during the Red Hat Summit and JBoss World in Boston, recognised Verizon for "...the most successful migration from proprietary solutions to open source alternatives." Specifically, Verizon won the award for the company's implementation of a new standards-based business process management system. This was for the company's Integrated Management Platform for the Advanced Communications Technologies (IMPACT) automated platform, which monitors, troubleshoots and resolves network service interruptions.

Canonical joins GENIVI

Canonical is joining the GENIVI Alliance, an automotive and consumer electronics industry association driving the development and adoption of an open 'In-vehicle Infotainment' (IVI) reference platform. The company behind the Ubuntu project is also creating a GENIVI-compliant Ubuntu IVI remix, based on the Ubuntu Core subset of the Linux distribution, which supports Intel and ARM processors.

GENIVI was founded by ARM, Intel, BMW, Jaguar, Delphi, Magneti Maelli, Citroen, Visteon and XSe in 2009 and now has many members in the IT and automotive industry.

Mandriva ties up with Zarafa

Mandriva, a publisher of Linux solutions, has announced the availability of the Zarafa Collaboration Platform (ZCP) on the Mandriva Enterprise Server 5 (MES5) platform. Zarafa is the Microsoft Exchange replacement for Linux servers, which allows users to share e-mails, calendars and contacts using Outlook or a Web access. The integration includes a specific installation and configuration wizard as well as the possibility to manage Zarafa users in the Mandriva Directory Server (MDS) of MES5.

Mandriva and Zarafa have also inked a technological and commercial partnership contract to ensure the best possible support and maintenance for MES5 users deploying ZCP.

STUDY GUIDE

RHCE SERIES

LINUX ESSENTIALS, SERVICES
& SECURITY

LEARN BY EXAMPLE

VIPIN GUPTA

Price: US \$40, India Rs. 650/-

This study guide starts from basics & takes you to advance levels of linux, everything has been explained by giving examples. Proper lab setup along with diagrams has been given so that you can construct the labs yourself & do the practice. It covers the course contents of RHCE. It is for those who want to start fresh as well as who have done RHCT/RHCE

It is available in ebook as well as paperback format. Paperback edit on is available only through direct order. For more details visit our website or email

About Author: Vipin Gupta is BE, RHCE, CEH, ASM, CCNA, MCSE, MCSA. He has got more than 17 years of experience in IT related fields. During his long career, he has been associated with various engineering colleges, polytechnics, private institutes & corporate sector.

Courses/Workshops

- Linux Administration
- Linux Security Specialist
- LMS using Moodle
- 1-Day/3-Day/5-Day Workshops

*we focus more on
knowledge than on
certifications*

*we also provide
virtual classroom solutions
for colleges/schools*
