

Software		New features / Major updates	Download@
OpenOffice.org 3.3.0		Latest major release of the Oracle-owned open source office suite. Features an updated Extension Manager user interface (UI) and several improvements to Calc spreadsheets.	http://bit.ly/1feEI
Alfresco Enterprise Edition 3.4		Features enhancements to the user interface aimed at making document sharing more social. Includes Web Quick Start, a set of templates that can be used for building content-rich sites on top of Alfresco Share.	http://bit.ly/dyDNM
Sabayon Linux 5.5		Features the latest 2.6.37 Linux kernel and includes a choice of either GNOME 2.32 or KDE 4.5.5 as the desktop environment.	http://bit.ly/8Wxwlv
KDE SC 4.6.0		Brings "significant improvements" and focuses on improving the performance and stability of development platform. Features a new "Share" button in the Gviewview image viewer to export pictures to popular photo sharing and social networking sites.	http://bit.ly/1w9sJQ
Perl 5.12.3		Built-in functions keys, values now work on arrays rather than just hashes.	http://bit.ly/g5wFUh
OpenSSH 5.8		Addresses a legacy certificate signing vulnerability that was introduced in OpenSSH 5.6 which could lead to "leaking confidential information".	http://bit.ly/gQ3vFK
Chrome 9.0 Stable		Brings the Chrome Web Store to all users in the US and features the addition of support for WebGL. Also includes support for Google Instant search and addresses nine security vulnerabilities.	http://bit.ly/3fQy3Z
Parted Magic 5.10		Features the return of Firefox as the default browser; since version 4.7, Chrome or Chromium has been the default browser.	http://bit.ly/1gQNDR
RubyGems 1.5.0		New version allows Ruby 1.9.2 users to upgrade to the latest RubyGems.	http://bit.ly/16KEUH
jQuery 1.5		Features a rewrite of the Ajax module which brings a higher level of consistency to the XMLHttpRequest methods across platforms. Also includes support for Deferred Objects and jQuery.sub().	http://bit.ly/mGYvS
Node.js 0.4		Second stable branch of the server-side, event-driven JavaScript framework. Incorporates an overhaul of the TLS/SSL system which undoes the interweaving of the socket code, and OpenSSL to create a more simple architecture and API.	http://bit.ly/cUE1p
Songbird 1.9.3		First stable release of the 1.9 branch of Songbird. Features updates to the built-in digital store with music recommendations and the addition of a Play Queue.	http://bit.ly/aSVMfe
JBPM 5.0		Integrates Eclipse tooling for developers, allowing creation, advanced debugging and process deployment. Includes a process repository that allows you to manage process definitions using a browser user interface.	http://bit.ly/1PCaIk
WordPress 3.0.5		Adds two new security enhancements--the first of which improves the security of plugins which were not properly utilising the platform's security API and the other provides better defence against a vulnerability that was fixed in the previous version.	http://bit.ly/awWa6Z
PC-BSD 8.2 RC3		Based on FreeBSD 8.2 RC3 and includes fixes for several issues in the previous release candidates; third and possibly final release candidate for version 8.2 of their BSD open source operating system for desktops.	http://bit.ly/hBsum
OpenShot 1.3.0		Features the ability to add multiple clips to a timeline in one step, many new effects and filters and automatic detection of image sequences.	http://bit.ly/bCF0dH
Tiny Core Linux 3.5		10 MB Linux distribution; offers a 2.6 Linux kernel, BusyBox, Tiny X and FTK, to provide a minimal GUI desktop.	http://bit.ly/equlqy
Google Web Toolkit 2.2.0		Supports HTML5-specific functions such as <canvas> elements.	http://bit.ly/eqPzt
