Linux For You (BT Infinity): You can read some content of the magazine on Linuxforu.com. You may however not find the latest editor's content there. For that you will have to subscribe or buy a copy. For buying a single copy of the current edition, here's the link: <http://electronicshanty.com/electronicshanty/subscribe/subsca.asp>; we will very soon be launching the LFY eZine version and then you will be able to subscribe to the eZine version and read the magazine, online. The eZine facility will be available for FREE to the print edition subscribers.
