

ASUS to release Eee Pad Slide soon in India

ASUSTek Computer will probably release its latest tablet, Eee Pad Slide SL101, in India by October. The device, which has already been launched in the UK, has a 25.7 cm (10.1 inch) touchscreen of 1280 x 800 pixels with an LED backlight. The display will also support a multi-touch interface for up to 10 fingers. It will have an Nvidia Tegra 2 SoC processor with a 5 MP front and 1.2 MP rear camera. Along with 1GB of RAM, the tablet will include an Android 3.1 Honeycomb operating system.

Other specs include 16 GB and 32 GB of memory, ASUS Web Storage support, HDMI, USB and microSD slots, while Zinio Reader and Press Reader will be pre-loaded on the tablet. A keyboard dock will also be provided for easy use of the tablet and also to conserve battery life.

WANDisco's uberSVN now available on Mac OS X

WANDisco, a leading provider of Apache Subversion-based software and services for the enterprise, has announced the release of uberSVN for Mac OS X, which includes the latest release of OS X

Lion, making this the first Subversion distribution built on Apple's latest release of OS X. uberSVN combines Subversion's first-ever social coding environment with a rich set of repository and user management capabilities on an open, easy-to-extend platform.

uberSVN has been receiving rave reviews since it was launched at the end of April and WANDisco has recently launched the uberApps store, an online marketplace that takes the Apple App Store concept and applies it to enterprise software development tools for Subversion. All of the free and paid-for applications in the uberApps store have been tested and certified to work with Subversion and uberSVN.

CarPad Aura—the new 3D navigation interface

MapmyIndia launched its tablet on August 30, 2011, at the Qualcomm event IndiaOn 2011. Powered by the Qualcomm S1 Snapdragon processor with an Adreno 200 GPU, the CarPad is pre-installed with Aura, MapmyIndia's latest navigation interface. The 3G device is based on the Android 2.2 operating system and has a 17.8-cm (7-inch) capacitive touch screen.

What makes CarPad unique is that it gives live turn-by-turn voice

Bihar deploys Android phones for MNERGA projects

The Bihar government has decided to deploy Android phones to monitor projects taken up under the Mahatma Gandhi Rural Employment Guarantee Act (MNREGA) in the state. The district administration of Munger has deployed Bizframe's Mobile Inspector on Android phones in order to monitor the implementation of MNREGA schemes in the panchayats of all its eight blocks. Such a step has been taken to bring transparency to the projects and monitor the progress of the MNREGA schemes in remote villages, which have poor connectivity. So far, the progress of the projects has been encouraging.

Pearson launches Plug and Play

The Pearson publishing house has made use of open source to launch its digital platform, 'Plug and Play'. By making its proprietary content available to third-party digital developers, it will let in-house and external developers create digital applications using Pearson-owned content. The publisher also aims at increasing brand awareness and exploring new business models eventually.

LiveMango.com launches Android app for PR industry

LiveMango.com has rolled out India's first Android app for the public relations industry called the Press Release

app. The app is used for reading press releases and company information. It's a helpful tool for journalists, news readers, authors and the PR industry. It can be downloaded for free from the Android Marketplace.
